Discuss with your group how to find out if the table can fit out the door.

Decide how you will measure.

Measure what you need to. Discuss with your group if the table will fit out the door.

Fill in your recording sheet.
Fill in your recording sheet.

Measure your tower two different ways.

Build your tower.

As a group, design the tallest tower you can build with the blocks.
Get the objects and weigh them.

Try new objects if you need to. Fill in the recording sheet.

Decide with your group which objects you will weigh.

A little less than 3 cubes.
A little more than 3 cubes.
Between 5 and 6 cubes.
Less than 2 cubes.
More than 9 cubes.

Find objects that weigh:
Measure the cube another way.

Discuss with your group how you will measure how much the cube can hold.

Discuss with your group which is the best way to measure the cube.

Fill in the recording sheet.

Measure the cube one way.
Measure the cylinder another way.

Discuss with your group how much the cylinder can hold.

Discuss with your group which is the best way to measure the cylinder. Fill in the recording sheet.

Measure the cylinder one way.
Find objects that weigh:

- More than 10 cubes.
- Less than 1 cube.
- Between 3 and 5 cubes.
- A little more than 7 cubes.
- A little less than 2 cubes.

Get the objects and weigh them.

Try new objects if you need to. Fill in the recording sheet.

Decide with your group which objects you will weigh.
