myUVM – How to: Fragments

1. Click the **Content Layout** link.

   ```
   Content Layout   Welcome
   You are currently logged in.
   ```

   Unfortunately, a current bug in the system requires you complete the steps for subscribing to a fragment twice before the fragment will appear.

2. Select **Fragments** from the top right hand side of layout view.

3. Click **Subscribe** next to the fragment you wish to appear.

   ```
   Content Selector
   Subscribe  Unsubscribe  administrator
   Subscribe  Unsubscribe  employee view
   **Subscribe**  Unsubscribe  student view
   Subscribe  Unsubscribe  faculty view
   ```

   In the example above I’ve selected the **student view** fragment so that I will have access to the student tab.
4. To select where you’d like the fragment to appear within the tab menu click the appropriate **red arrow**.

5. You should now see your new fragment appear as a tab in the layout view.

6. Click the **Content Layout** link.

7. Select **Fragments** from the top right hand side of layout view.

---

**Unsubscribing from Fragments**
Click **Unsubscribe** next to the fragment you no longer wish to appear.

### Content Selector

<p>| | | | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
