

MATH 213: Calculus and Introduction to Differential Equations
Fall Semester 2009
Lecture 1, Discussion Section 303

Lecture Information:

Doctor Dongming Wei

MWF 12:05-12:55, Van Vleck B239

Textbook: *Calculus with Applications, 9th Edition*, by Lial, Greenwell, and Ritchey

Discussion Section Information:

TA: Christelle Vincent

Office: 516 Van Vleck

<http://www.math.wisc.edu/~vincent/303.html>

Email: vincent@math.wisc.edu

Office Hours: Monday from 1:00 to 2:15

Tuesday from 12:00 to 1:00

Thursday from 1:00 to 2:00

as well as by appointment

Grading: Your letter grade for this class will be based on your performance on quizzes and exams, where the scores will be weighted as follows:

Quizzes: 20%

Midterm I (10/5): 20%

Midterm II (11/9): 20%

Final Exam (12/18): 40%

Exams: Please note that the dates of all exams have already been decided. The midterms will be given in class, and the final exam is at 7:25PM. Make sure to clear your schedule for these times as we may not be able to grant requests for exams at alternate times. If you already know that you have a conflict with an exam, please let me know immediately. Calculators will not be allowed during exams.

Homework: Homework will be assigned weekly by Doctor Wei, and due every week in discussion. I honestly think that solving these problems is the single most important thing you should do to do well in this class, so please do your homework seriously.

Quizzes: There will be a quiz every week at the beginning of discussion section. The quiz will have two parts: For the first part you will be allowed to have your homework with you, and the question will be taken directly from the homework that is due that day. Since you should basically just be copying this problem from your homework to the quiz, special attention will be given to neatness and clarity in the grading. For the second problem you will have to put away your homework, and the problem may or may not be taken directly from your homework. If not, it will be similar to your homework and doing the homework will prepare you for it. Your two lowest quiz scores will be dropped. There will be no make-up quizzes under any circumstances.
