

Math 295 - Fall 2020  
Redo Week Instructions

If you are not sure if you are taking this class for graduate or undergraduate credit, please send me an email or a private chat on Teams and I can tell you which section of the class you are enrolled in.

**Instructions for all students:**

- Homework will be collected and graded on Gradescope on Monday at 11:59pm, on Wednesday at 11:59pm, and on Friday at 11:59pm.
- You may only turn in each problem on the homework **once** during the week. The multiple due dates are for your convenience, if you would like to receive feedback earlier in the week. (For example, you may want to solve one problem covering Objective A3, see how you do, then decide if you wish to try this objective again or not later in the week.)
- You will receive your new objective scores within 24 hours of the submission deadline on Tuesday and Thursday.
- Your objective scores cannot decrease; there is no penalty if you attempt a problem and don't do well.

**Instructions for undergraduate students:**

- You may solve as many or as few problems as you wish on the Redo Homework to improve your objective scores. You are encouraged to solve all of the new problems.

**Instructions for graduate students:**

- You are required to turn in an attempt on every new problem of the Redo Homework. An attempt means spending at least 30 minutes thinking about a problem, and submitting the definitions and theorems you believe are pertinent to this problem, and any thought you had about the problem, whether or not they lead anywhere.
- You may solve as many or as few of the repeat problems as you wish on the Redo Homework to improve your objective scores.
