

Long title of this sample presentation with all of
the important words in it

Christelle Julie Marie Catherine Vincent (not my real full name)

The University of Vermont

Very nice prestigious conference

Sunny location

March 29, 2018

The title can be put as an argument of the frame

Theorem (Important mathematician)

theorems, definitions, etc. are put in a nice cute box

Work on balancing your slides and not making them look crowded by using bigskip as often as possible.

Currently this slide is plenty full, NEVER put up a wall of text!

The title can also be put in separately like this

To make text appear sequentially from top to bottom, you can use the simple command pause.

The title can also be put in separately like this

To make text appear sequentially from top to bottom, you can use the simple command pause.

Now this bit appears later.

The title can also be put in separately like this

To make text appear sequentially from top to bottom, you can use the simple command pause.

Now this bit appears later.

Note how without the bigskip the first two sentences are very close!

Having stuff appear above

There is a way to control exactly what appears when with the onslide command.

Having stuff appear above

For example things can appear above, and stay forever.

There is a way to control exactly what appears when with the onslide command.

Having stuff appear above

For example things can appear above, and stay forever.

Or only stay for a little while.

There is a way to control exactly what appears when with the onslide command.

Having stuff appear above

For example things can appear above, and stay forever.
And then go on their merry way.

Pictures, gifs and videos

I only know how to include pictures

Pictures, gifs and videos

I only know how to include pictures

Pictures, gifs and videos

I only know how to include pictures

But I've seen people put in animations so it should be possible to embed videos and gifs.
