Did the new version meet the requirements asked by the editor-?  
“Timing and style of deposition on humid- temperate fans, Vermont, USA”

Overall

I feel you meet much of what was asked you of you:

Strengthening the discussion

Moved material from the discussion that was more appropriate for the results section

Added detailed consideration of aggradation rates over time

Added correlation of fan records to other paleoclimate archives

You integrated legends into the figures

You removed redundancy from the data repository as you requested.

Reviewer #1-

You meet all that was asked

Reviewer#2-

You meet all of these also
