

Landscape Response in Steep, Orogenic Mountain Belts: Taiwan Central Range

Penn State University

I am new to cosmogenic radionuclide dating. I will be assisting PhD candidate Will Hefner with his samples from Oregon as well as a set of samples to estimate erosion rates in the Central Range of Taiwan. The results from Taiwan may be incorporated into my master's thesis research.

Visitor: Samuel Williams
Visit dates: February 23-27, 2026

I am a first-year master's student at Penn State University under the advisory of Eric Kirby. I grew up in Florida and completed my undergrad at the University of Florida. In my free time, I play competitive ultimate frisbee and enjoy playing Dungeons and Dragons.
