

# SciShield Door Sign Accepted Locations

Sci Shield Door signs communicate hazards, regulatory information, and contact information for all areas considered laboratory in nature (40 CFR section 262.200 subpart K).

Signs must be on the outside of the laboratory door facing the hallway to indicate hazards of the space.

Sign holders have an adhesive back and will remain on the door to replace the current yellow laboratory signs. This allows for signs to be changed as needed by printing a new sign from the Sci shield menu as hazards and personnel change.

Once these signs have been posted with hazards and required regulatory information any extra signs on doors can be taken down.

Acceptable sign placement below:

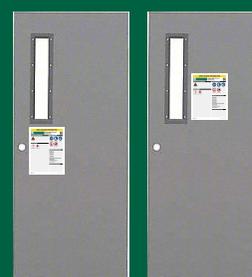

*Flush*

*Vision Light*

*Half Glass*

*Narrow Light*

*Full Glass*
