Welcome to the Vermont Vegetable & Berry Growers Association Pick-Your-Own Farm Finder

[Search by Map](#)[Search by List](#)

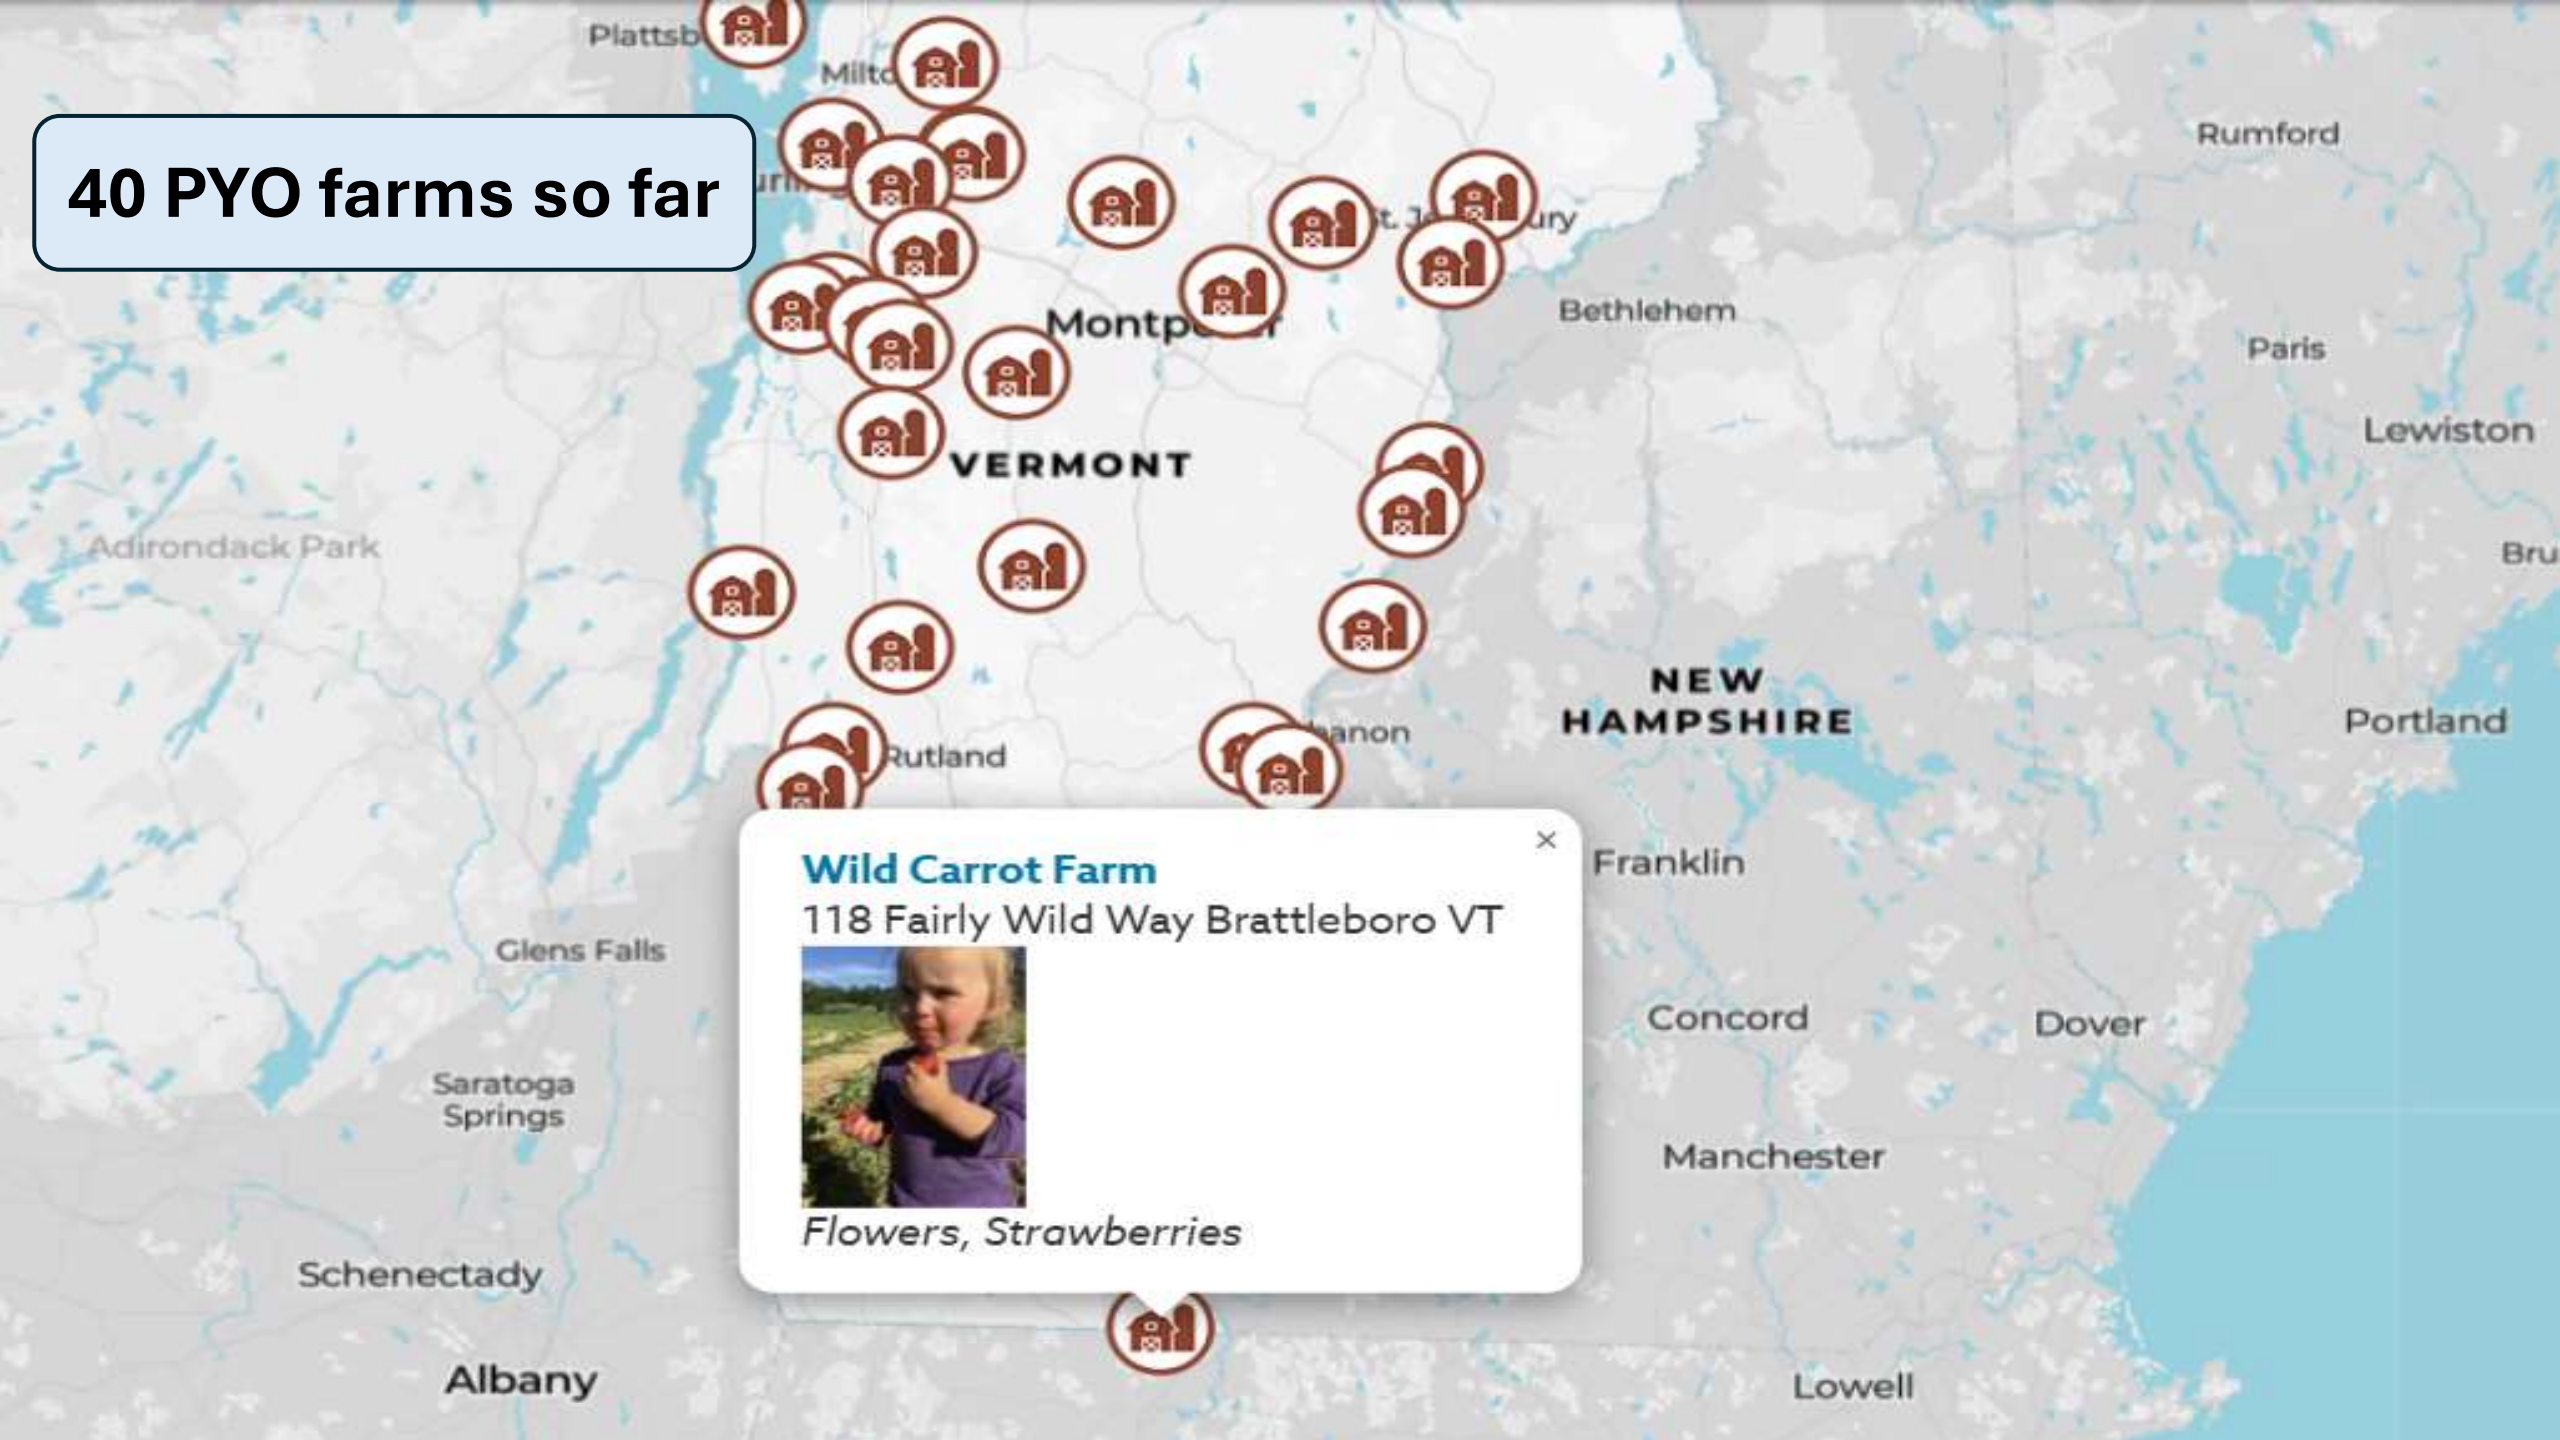

There are many fresh fruits, vegetables, and flowers available in our region – and some can be harvested by you and your family! "Pick-your-own" farms offer crops from early summer until the first frost in fall, including apples, blueberries, cut flowers, pumpkins, strawberries and more. Experience the benefits of pick-your-own:

The freshest produce at a fair price

It doesn't get any fresher than when you harvest it yourself! Pick-Your-Own crops are often less expensive than those at the grocery store or farmers' markets.

40 PYO farms so far
