

Hello! I'm Jordan Grabo. I am a freshman Economics and Sociology double major. I am running for SGA Senate because I believe there is an amazing opportunity to bridge the gap between the student body and the administration of our university. I have been a leader my whole life. I have been the captain of every sports team I have been involved in, I was elected as an SGA officer in high school, as well as an executive member of the UVM Outing Club. However, experience is not my only qualification. I am a great listener, a strong voice, a question asker, deeply empathetic, and I am a talented communicator . I bring an open mind and heart to any conversation I am involved in, and will do right by the wishes of those I represent. I am specifically interested in creating more volunteer opportunities through the school. I also believe it would be important to continue the school run social events that help bring the student body together and create more school pride (Go Cats!). All in all, I am running because I believe I will do right by the students I represent, and will be a successful leader in these positions. I am thrilled to be a liaison between the students and administration of this beautiful university. Thank you for taking the time to read!
