

Obstetric Unit & Emergency Department Collaborations on AIM Bundles

Checklist:

- ☐ Identify your Team
 - To Include:** Inpatient Nurse Leader & OB Provider, Outpatient Nurse Leader, Anesthesia Provider, Emergency Department Nurse Leader & Provider, & Case Management/Social Work
- ☐ Meet with Emergency Department Colleagues to Discuss:
 - ☐ **Triage Process in ED:**
 - Identification of pregnant or recently pregnant persons:
 - How can this be added into triage process?
 - What needs to be done in EMR to assist/document this process?
 - When to consult OB colleagues?
 - When to transfer to L/D?
 - ☐ **Activation of Emergency Response Teams:**
 - Identify current Code/Rapid Response/OB Emergency teams already in place
 - Are all the correct stakeholders included on these teams?
 - Is it clear to staff how to “activate” these teams?
 - ☐ **Education of Staff and Providers:**
 - Role-specific education that includes warning signs of PPH and HTN on orientation, when changes occur, and at least every 2 years
 - *Topics to include:* warning signs, acknowledging biases and not making assumptions based on other factors, QBL, treatment algorithms
 - How will this be executed?
 - ☐ **Resource needs:**
 - Equipment:
 - PPH: equipment and medication access
 - HTN: medication access
 - Algorithms:
 - What assessment and treatment algorithms will be used and available to staff?
 - Checklists:
 - What checklists are available to staff for emergencies?
 - ☐ **In-situ drills:**
 - How can these two topics be added into Professional development days as multi-disciplinary drills?
 - What structure needs to be in place to coordinate 1 annual drill that tests systems [call system, blood bank, etc.]
- ☐ How does the above actions integrate into your guidelines?
