Today's Objectives

- Describe the pilot project recruitment criteria and process
- Describe VITL and the current VITLAccess technology
- Demonstrate the use of the new VITLAccess functionality for uploading and sharing SPoC

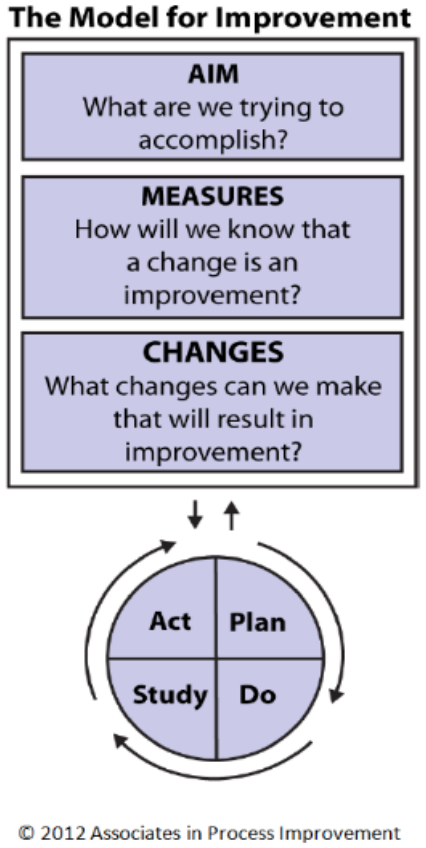
VCHIP Care Coordination Collaborative

Care Coordination Collaborative Meetings bring together interdisciplinary partners to advance our shared vision of optimizing care coordination services for children and youth with special health needs.

Our Quality Framework



Nundy S, Cooper LA, Mate KS. The Quintuple Aim for Health Care Improvement: A New Imperative to Advance Health Equity. *JAMA*. 2022;327(6):521–522. doi:10.1001/jama.2021.25181

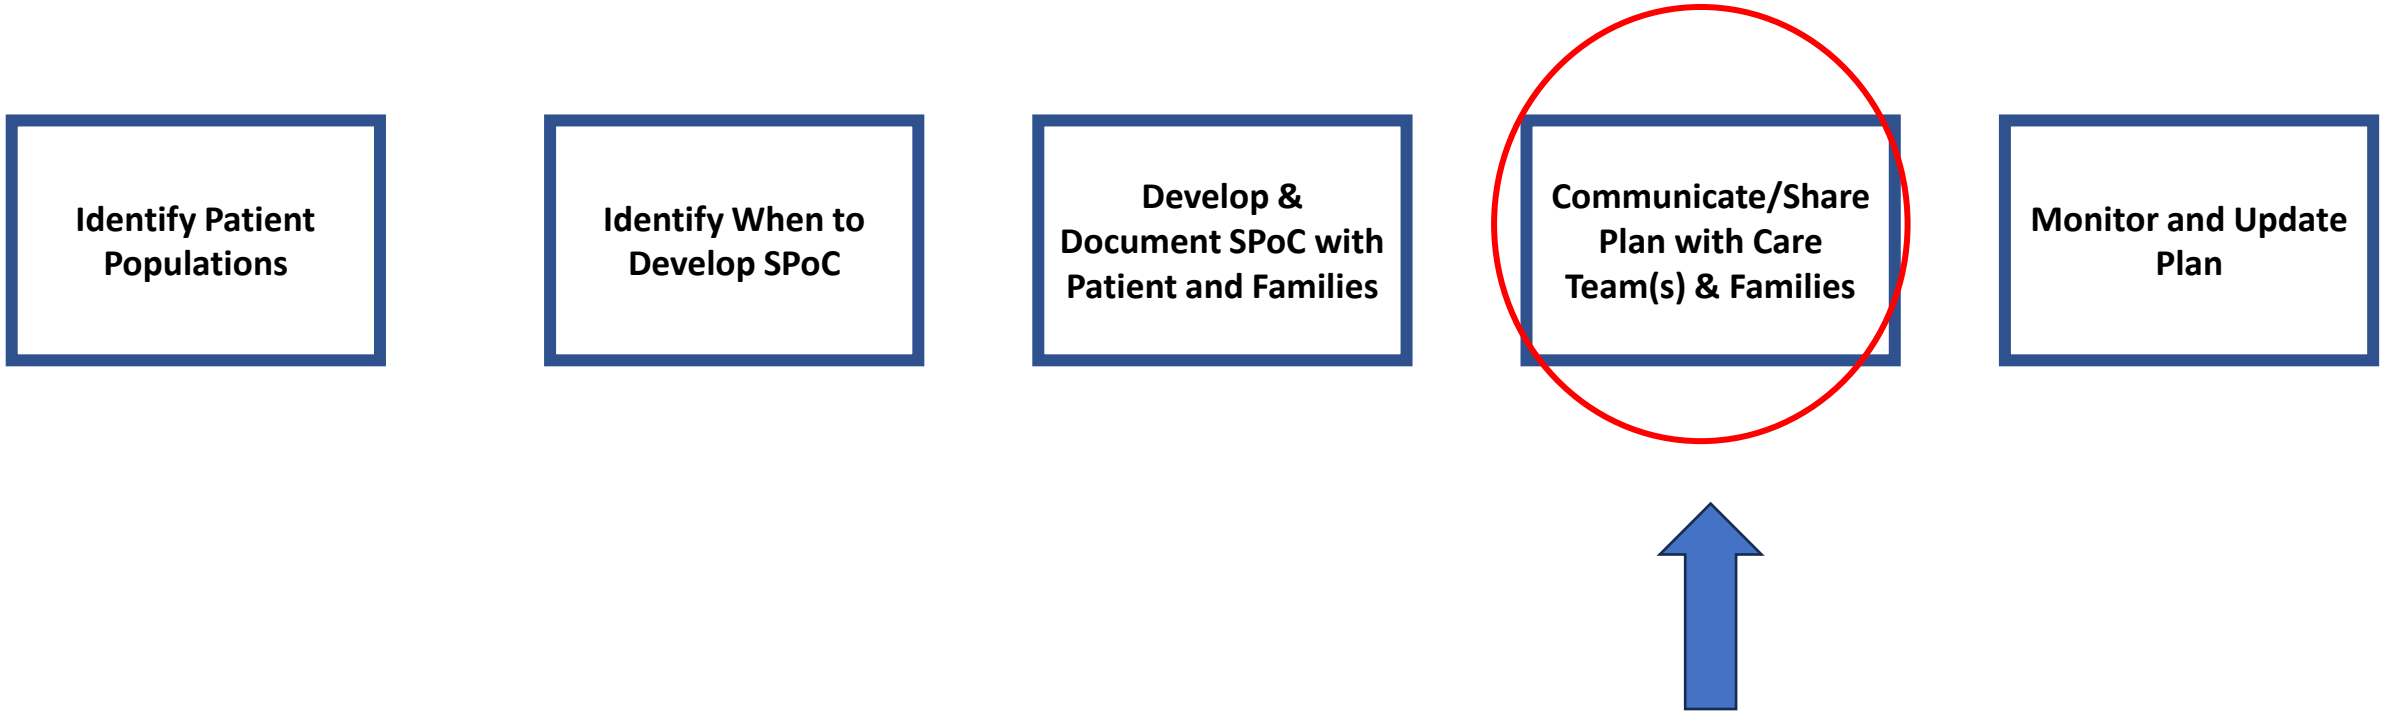
Current Process for Developing & Sharing Shared Plan of Care (SPoC)



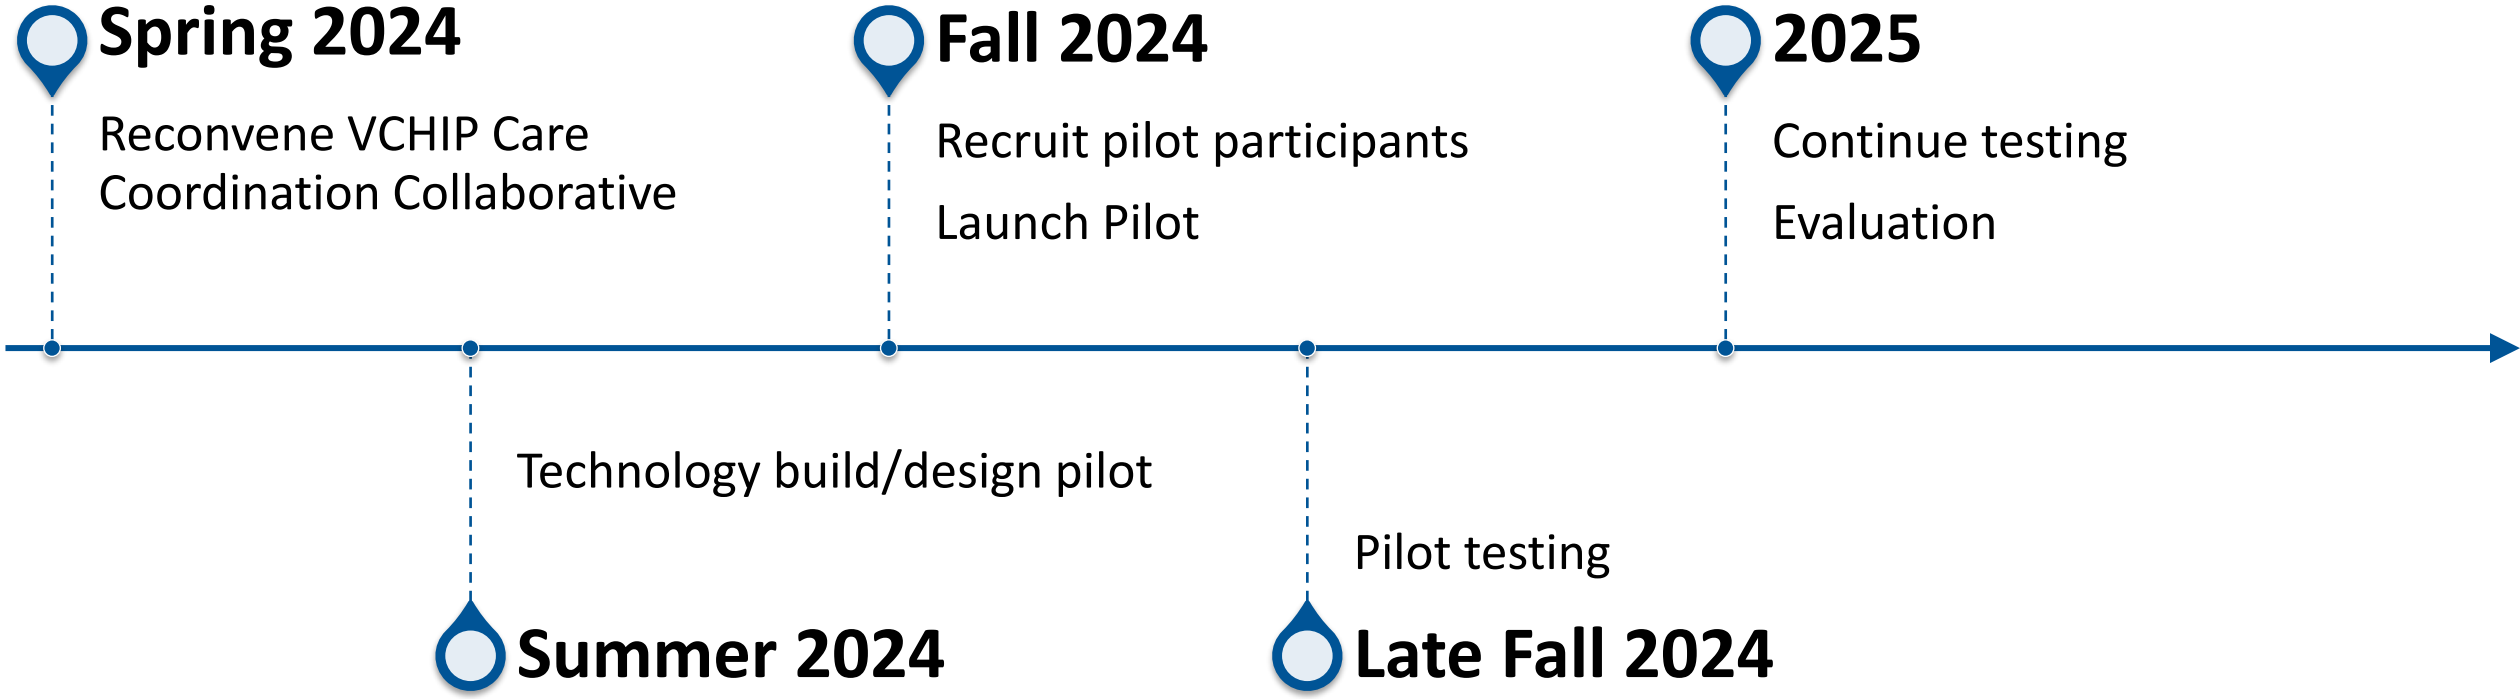
Opportunity Statement and Global Aim

This project would support pilot users in developing a Shared Plan of Care (SPoC), with patients and families, within their current Electronic Health Record. PDF copies of the SPoC would be uploaded by the care team to VITLAccess where the user would categorize the document as a SPoC. Other VITLAccess users would be able to access the SPoC document within VITLAccess as needed.

Global Aim:

Implement our shared vision for optimizing technology to support the utilization and accessibility of Shared Plans of Care for children and youth with special health needs

Anticipated Timeline



VERMONT DEPARTMENT OF HEALTH

VCHIP Vermont Child Health Improvement Program UNIVERSITY OF VERMONT LARNER COLLEGE OF MEDICINE

Recruitment

Ideal pilot user will be a HIPAA covered entity/care team

- Already VITL data contributor and/or data user [or are willing to complete necessary VITL agreements/training

  AND

- Already working with several care team partners in developing and sharing SPoC (or other care plans)

Pilot User Roles

Upload and Label SPoC

- Medical home care coordinator or clinician creates SPoC with family
- Medical home has a need to share the SPoC with essential care team members
- Medical home uploads and labels the SPoC document in VITLAccess
- Medical home prompts other essential care team members to log in VITLAccess to view the SPoC

View and Access

- Essential care team member identified by Medical Home receives prompt
- Care team member logs into VITLAccess and locates the updated SPoC
- Views and accesses the document within VITLAccess
