What is a Knowledge Rate?

According to the National Association of Colleges and Employers (NACE), knowledge rates in Career Outcomes surveys are defined as ‘the percent of graduates for which the institution has reasonable and verifiable information concerning the graduates’ post-graduation career activities¹. At UVM, we use a post-graduation outcomes survey to capture most of our graduates’ information as well as additional knowledge from reputable sources which capture the same information that the survey asks. The knowledge rate refers to the percentage of all UVM Graduate Degree Earners in a given class year for whom we have post-grad outcomes information, regardless of whether the information was obtained through the survey or through additional sources. Sources of information are listed below.

Knowledge Rate Sources:

Graduate survey (available from June 1 to December 31, 2024)
National Clearinghouse database
UVM PeopleSoft database
Staff, Faculty, and Family submissions
Web searches (e.g., LinkedIn)

Methodology

Purpose:

The UVM Career Outcomes survey follows the NACE First-Destination survey standards and protocols while specialized to reflect the unique aspects of The University of Vermont. The survey is designed to show current and prospective students the employment and continuing education activities of UVM's graduates as well as to assist colleges and administrators in understanding areas of growth and improvement. This is a joint effort between the Career Center, Academic Affairs and Student Success, and the Office of Institutional Research and Assessment.

Data Collection:

The Career Outcomes data are collected within six months of students' graduation using the Qualtrics survey software. The graduates are contacted via email and prompted to take the survey and can update their status as their plans change. Multiple email reminders are sent out during the data collection period.

Additionally, information on graduates who haven't responded to the survey is collected via other reliable sources and tracked for auditing purposes. The knowledge sources include information from the National Student Clearinghouse, UVM PeopleSoft systems, Unit/Department submissions, Web Searches (e.g., LinkedIn, Facebook, UVM connect), and in some cases, phone calls to the students. Note that if a student later responds to the survey, that first-person response is the information that would be kept and prioritized over the additional knowledge rate collection information. This follows the post-graduation collection processes outlined by NACE, the National Association of Colleges & Employers.

Once the data collection period is over, the data is cleaned and analyzed in January.

Representativeness

The survey respondents are compared to the non-respondent graduates to gain a sense of the representativeness of the sample. This is broken down by Sex, Race/Ethnicity, and Residency (In-State vs. Out of State). For further detail please see **Error! Reference source not found.**

Definitions:

- The success rate are students who are working full-time, working part-time, participating in a volunteer or service program, serving in the US military, and matriculating into continuing education divided by total number of responses to the survey
- Mean salary includes only graduates who are employed full time by an organization (i.e. other types such as freelance work are excluded).

Important Note about Duplicate Degrees:

The number of graduates by degree type will not sum to the university total in some cases, as the university total reflects unique individuals, and the degree type numbers reflect students unique to that category (i.e., a student may have received a master's and a doctoral degree, so that student is counted once in the university total, but twice in the degree type categories).
