Curriculum

“The place-based focused of courses in the Rubenstein School really solidified my love for and connection to the state of Vermont. Regular lecture-style courses in the College of Arts and Sciences were just not working for me, and I realized I needed a more experiential approach to learning. The size of the Rubenstein School allowed me to create long lasting friendships and learn in a community rather than in a silo.”

- Environmental Studies Alum, 2013

“The interdisciplinary nature of a lot of the coursework gave me skills that ended up being desirable to employers and helped me in ways I didn’t expect in my work.”

- Environmental Sciences Alum, 2023

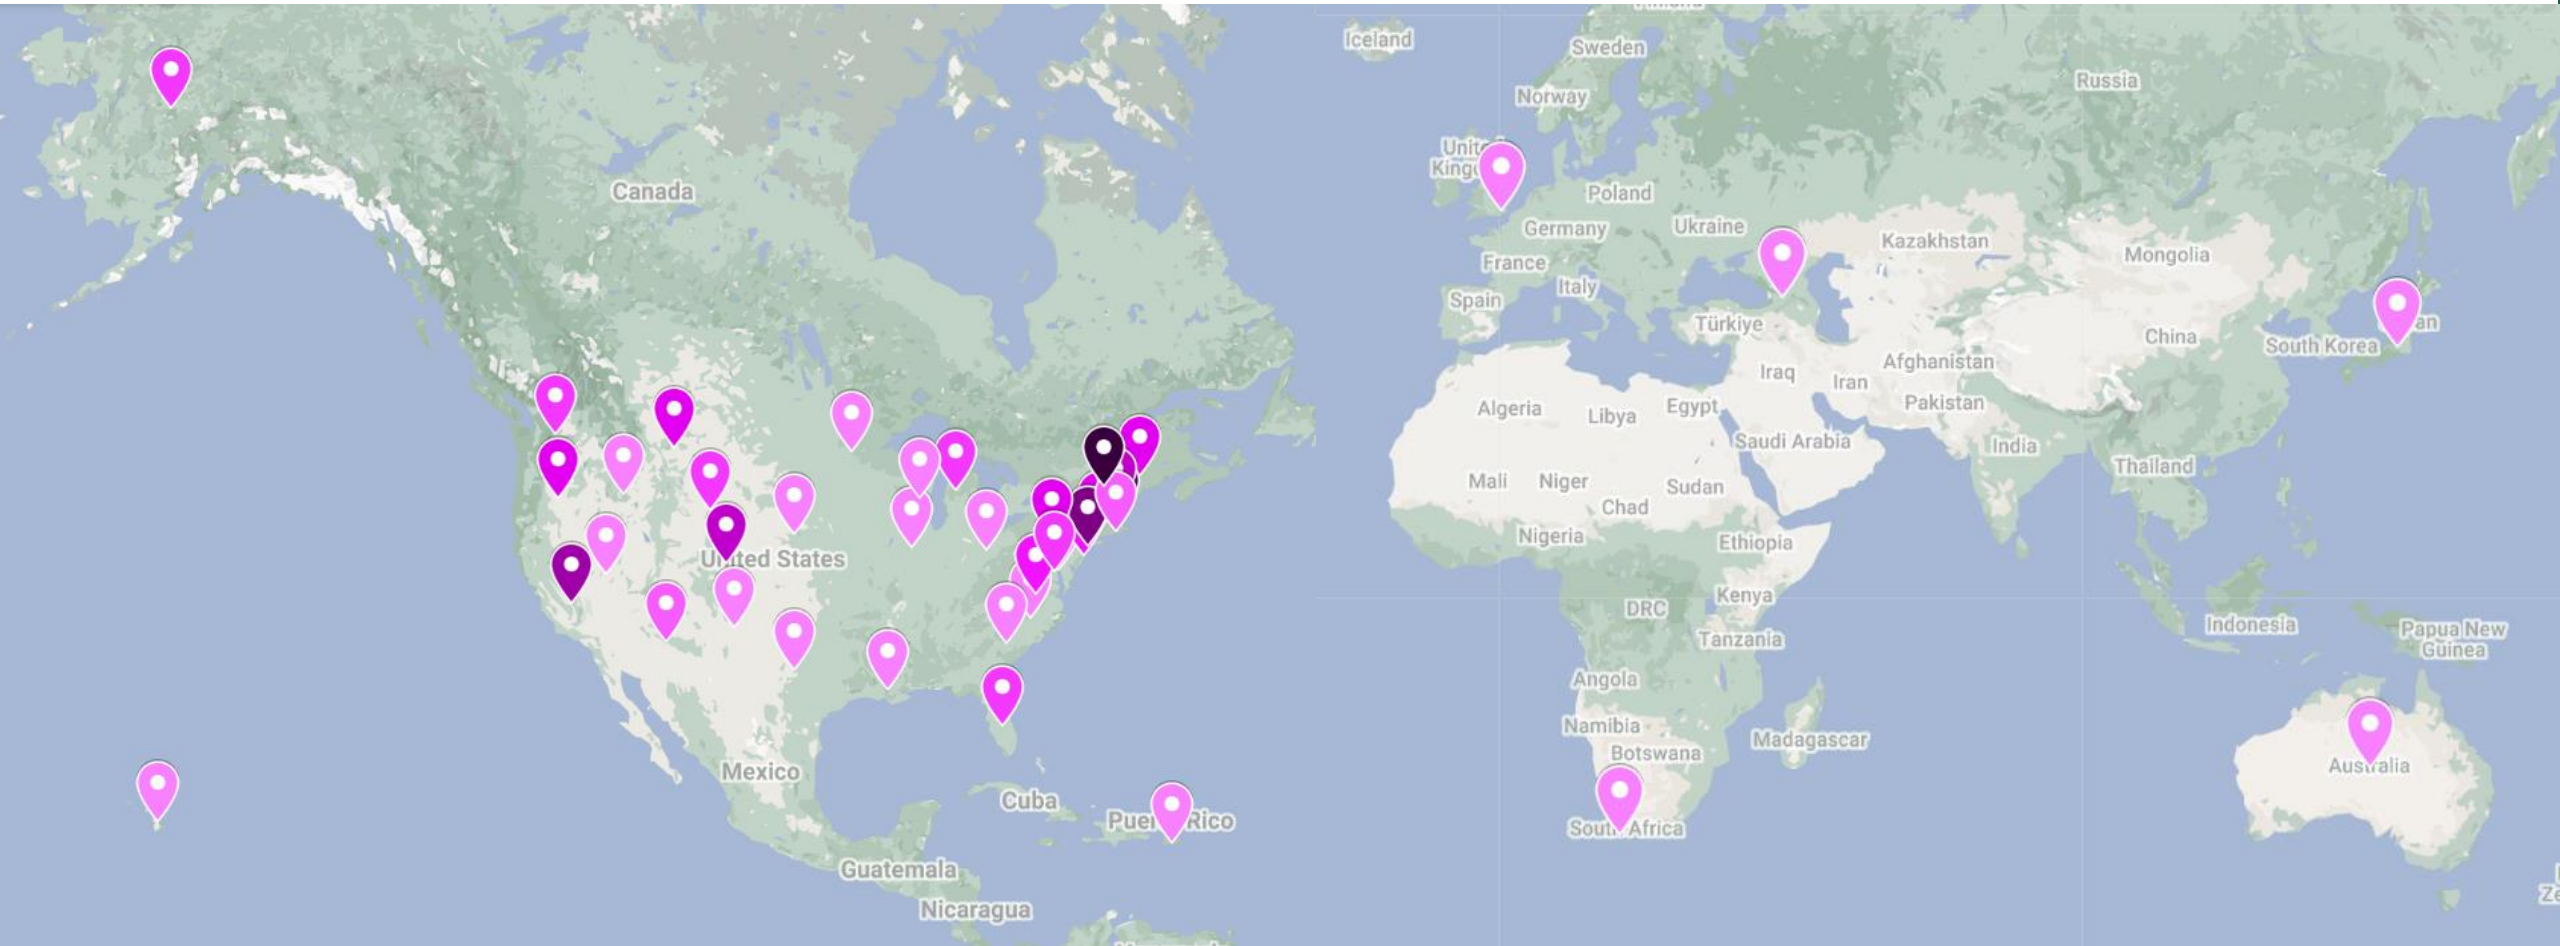

Where do they work?

- Ecological Restoration
- Data Analysis & Communication
- Environmental Communication
- Geospatial Technologies, Environmental Modeling & Mapping
- Fieldwork, Sampling & Laboratory Techniques
- Systems Thinking & Sustainability Frameworks
- Ecological Design & Sustainability Planning
- Environmental Problem Solving & Decision Support

Career

“We had Professors who actually had real world experience in the areas they taught which translated into a much easier transition into my career.”

- Recreation Management Alum, 1977

“The integrative nature of the program has been invaluable in a career in conservation biology where the problems being addressed are multi-disciplinary.”

- Environmental Sciences Alum, 2001

Impact

Extracurriculars and RSENr Impact

New and Ongoing Engagement

- Alumni expressed a lot of interest in engaging with RSEN!

- Contact with students (e.g. informational interviews)
- Receive email communications (e.g. RSEN eNewsletter)
- Participate in Career Panels
- Alumni meetups
- Rubenstein/University Events (e.g. UVM Weekend)
- Offer jobs/internships
- Present workshops for students
- Receive career support from Rubenstein

New and Ongoing Engagement

- Ways we're already using the data:
 - Career panel of 6 first-time alumni participants!
 - Alumni engagement with UVM Career Center Food, Environment, & Sustainability (FES) Interest Group signature event
 - Planning collaboration with Student Advisory Board for major-specific alumni career panels
 - Matching students with internship/research/job opportunities

RSENr Impact

- Extent to which our alums feel that their RSENr education helped them develop the following competencies:

Communication: to employ effective speaking, writing, listening, and digital communication techniques.

Teamwork: to contribute to collaborative efforts, facilitate contributions of others, and address conflict directly and constructively.

Working Across Difference: to critically examine dimensions of difference and apply a nuanced understanding of power and privilege through effective communication.

Problem Solving: to design, evaluate, and employ appropriate frameworks in order to effect change and generate collaborative solutions to complex problems.

Inquiry & Analysis: to apply critical thinking skills and employ qualitative and quantitative methodologies in order to formulate questions and evaluate core knowledge areas.

Integrative Learning: to synthesize and transfer learning to complex situations across disciplinary boundaries through the application of critical reflection skills.

RSENR Impact

- Extent to which our alums feel that their RSENR education helped them develop the following knowledge areas:

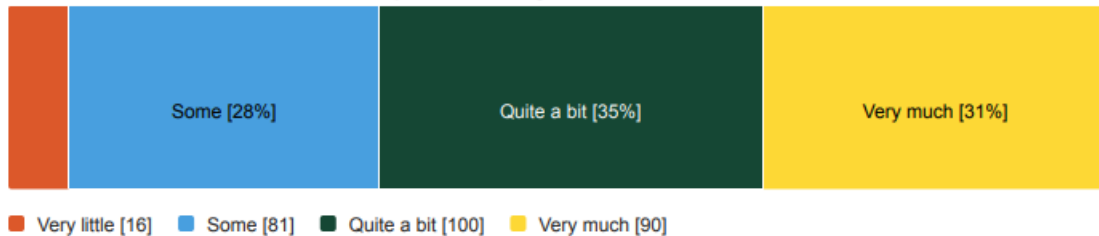

Ecological Processes & Systems: to identify and describe basic ecological processes and systems.

Planning & Management: to describe effective strategies in ecological planning, management, stewardship, and conservation of natural resources.

Social Processes & Systems: to identify, interpret, and analyze cultural, economic, historical, and political dynamics of environmental issues.

Sustainability: to discuss social, economic, and ecological principles of sustainability.

Community

“The community of the Rubenstein School made is very easy to connect with my professors and classmates and overall contributed to an amazing learning environment.”

- Parks, Recreation, and Tourism Alum, 2020

“Inclusivity of people from many different backgrounds and orientations as well as professors being very kind as well as professional. UVM felt like a home away from home where everyone had great care for the school and the environment.”

- Wildlife Fisheries Biology Alum, 2023
