12:00-1:00 PM

30-minute presentation | 30-minutes Q&A

Perinatal Mood and Anxiety Disorders: Beyond SSRI's

This is a talk on adjunctive and alternative medication options for perinatal mood and anxiety disorders and their relative safety when SSRI's are not a good choice for pregnant and breastfeeding patients. The goal of this talk is to help broaden your toolkit when perinatal psychiatry isn't quickly available.

Sarah Guth, MD
Pediatric Psychiatrist
