Centennial Woods: Bibliography

Natural Areas Reference Collection

University of Vermont

This list represents research relating to the University of Vermont's Centennial Woods Natural Area. Part of 11 total Areas, the woods have been in the University's possession since 1891. It has been a site for recreation, education, research, and preservation in the intervening years. The forest, which contains Centennial Brook, sprawls out behind East and Colchester Avenues, and is closely connected to the surrounding community.

The documents listed below are those which pertain to scholarly research undertaken in the Area. The documents are sorted by the location at which they can be accessed or found. Those housed in the Silver Special Collections or Howe Library are listed as such, and those held internally by the Natural Areas program are listed under the headings "Scholarworks" and "Internal Documents."

Not included in this list is a large volume of management material, such as correspondence, land use records, maps, news articles, and meeting minutes. If desired, please contact the Natural Areas Program for access to these documents.
