

Maple Sap Business Assistance

UVM Extension Maple Business continues developing financial tools and technical guidance to inform decisions about starting a sap business and is available to help landowners assess the viability of a maple sap operation. New funding to continue this program is limited to VT landowners.

Are you a forest landowner interested in assessing the economic potential of maple sap production on your land? Or looking to utilize your maple woods while maintaining forest health, develop sustainable forestry practices, or understand carbon markets and the forest carbon cycle?

Are you a maple producer looking to maximize your capacity or expand your operation by buying in sap from others?

Are you a maple entrepreneur or looking to start a business in the maple industry?

Some benefits of a maple sap business include:

- ✦ Lower barriers to entry and higher profitability; start-up costs about half the cost for a full sugaring operation.
- ✦ Strong demand for sap from an expanding maple products industry.
- ✦ Potential for economic incentives related to woodland management and forest carbon sequestration.

Interested or have questions?

Complete our brief intake form (<https://forms.office.com/r/7zhLUKRQez>) or contact Chris Lindgren, UVM Extension Forest Business Educator: christopher.lindgren@uvm.edu / 802-656-7583 / 1-800-281-6977

You can also find more resources and information about this project in the Sap section of maplemanager.org.
