PROJECTS & PROGRAM DEVELOPMENT

2014	Evidence Based Practice Training for Community Counseling Program Counselors, Chair Chaired expert task force to develop 5-day workshop on basic cognitive behavioral therapy skills and trauma-focused therapy, and delivered training to 200 U.S. Marine Corps mental health professionals at three installations.
2013-2015	Recognizing and Responding to Suicide Risk (RRSR)-USSOCOM, Trainer Revised RRSR curriculum for U.S. Special Operations Command and delivered 3 workshops for primary care medical providers working with Special Forces personnel to teach basic skills related to assessing and intervening with suicidal SF personnel.
2013	Veterans on Campus: Students and RAs, Curriculum Consultant Veterans on Campus: Students and RAs is an online role-playing training simulation that prepares student veterans to recognize when another student veteran may be experiencing underlying emotional distress or problems in life, including academic struggles and suicide risk, and how to talk with fellow veterans in a way that engages them and encourages them to seek out supportive services and mental health treatment.
2013	Virtual PTSD Clinical Assistant (VCPA), Consultant To provide better healthcare to PTSD patients, there is a strong need to develop a powerful PTSD CDSS based on evidence-based treatment strategies, acting as an anytime virtual assistant for PTSD professionals, Primary Care Physicians (PCP), and residents. To address this critical need, Intelligent Automation, Inc., proposes to develop an innovative Virtual PTSD Clinical Assistant with Cloud Computing and Mobile Interface: VPCA. The key innovation of VPCA is the utilization of Hadoop Ecosystem with scalable data storage and processing capability to enable the evidence based clinical decision support empowered by Watson-like predictive analytics across different domains for PTSD patients.
2012	At-Risk in Primary Care, Curriculum Consultant At-Risk in Primary Care is an online role-playing training simulation that prepares primary care providers to recognize when a patient's physical ailments may be masking underlying trauma-related mental health disorders, including PTSD and depression and how to build a treatment plan that engages the patient and integrates mental health so that the causes of the symptoms are addressed and treated. View demo at http://www.kognito.com/pcp/demo
2012	Man Therapy, Consultant

The Man Therapy website (www.mantherapy.org) was developed to specifically target men experiencing mental health distress, a subgroup of the population with a very high suicide rate and very low likelihood of accessing mental health treatment. The website takes a nontraditional approach to mental health outreach and suicide prevention by tapping into traditional male gender norms.

- 2009 – 2012 **Defender's Edge Program**, Program Creator & Instructor
The Defender's Edge (DEFED) Program is a mental health promotion program created while I was deployed to Iraq. This program differs from traditional mental health approaches in that it adopted a strengths-based philosophy intended to circumvent mental health stigma and prevent the onset of psychological and behavioral problems. The program has continued in the form of predeployment trainings for Air Force Security Forces personnel conducting combat missions. Since program creation in 2009, approximately 800 Airmen have participated in training at 5 different training sites.
- 2010-2011 **U.S. Marine Corps Suicide Prevention Program**, Task Force Chair
Chaired a task force of 6 suicide prevention experts to create a new suicide prevention training program intended for implementation across the entire U.S. Marine Corps. The resulting product included 4 separate manuals and 8 educational modules, and in-person delivery of beta testing to a group of 23 active duty Marines.
- 2010-2011 **U.S. Air Force Airman Resiliency Toolkit**, Curriculum Developer
Developed a mental health promotion program for the U.S. Air Force designed to teach basic skills for improving sleep, physical fitness, nutrition, personal meaning, distress tolerance, and problem solving. The ultimate goal of the program is to reduce the incidence of psychological morbidity across the entire Air Force population, and is intended to be the primary method for improving mental health for all active duty Airmen. Resulting products included a student manual, an instructor manual, and 5 educational modules.
- 2008 **Recognizing and Responding to Suicide Risk in Primary Care (RRSR-PC)**, Task Force Chair
Chaired a task force of 3 suicide experts and 3 primary care providers to create a 90-minute training curriculum for primary care medical providers to teach basic skills related to assessing and intervening with suicidal patients.
