

University of Vermont
Sustainability Studies and Global Environmental Equity
Faculty positions and Environmental Program Director

The expected teaching load is 4 courses per year (plus academic advising) to include courses on sustainability and equity, introductory large lecture core courses, other Environmental Studies core courses, and upper-level and graduate courses in the applicant's area of expertise. We would like to continue to offer many of the courses listed below and we also welcome and encourage course development on new and emerging topics of interest.

Core courses

(teach one or more of the following in rotation with other faculty)

ENVS 001 Introduction to Environmental Studies
ENVS 002 International Environmental Studies
ENVS 151 Intermediate Environmental Studies
ENVS 201 Research Methods

Intermediate courses
