# Ground Check Report

Date: _____     Checked by: _____

## Mapped Information

Survey Date: _____          Town: _____
Coded as: _____             Estimated Acres: _____
                                      Polygon Width: _____

## Ground Information

| Tree | Species | Symptom(s) | % Crown Affected | Notes |
|------|---------|------------|------------------|-------|
| 1-1  |         |            |                  |       |
| 1-2  |         |            |                  |       |
| 2-1  |         |            |                  |       |
| 2-2  |         |            |                  |       |
| 3-1  |         |            |                  |       |
| 3-2  |         |            |                  |       |
| 4-1  |         |            |                  |       |
| 4-2  |         |            |                  |       |
| 5-1  |         |            |                  |       |
| 5-2  |         |            |                  |       |
| 6-1  |         |            |                  |       |
| 6-2  |         |            |                  |       |
| 7-1  |         |            |                  |       |
| 7-2  |         |            |                  |       |
| 8-1  |         |            |                  |       |
| 8-2  |         |            |                  |       |
| 9-1  |         |            |                  |       |
| 9-2  |         |            |                  |       |
| 10-1 |         |            |                  |       |
| 10-2 |         |            |                  |       |

# Summary

| Species | Symptom | Avg. % Crown Affected |
|---|---|---|
|  |  |  |
|  |  |  |
|  |  |  |
|  |  |  |
|  |  |  |

**General Description of Damage** including species affected, proportion of trees affected and symptoms:

**Cause of Damage** including observation on population levels, site, etc.:

**Notes on Mapping of Damage Area** including location and size (note actual width if measured):

**Instructions:** Traverse the polygon, stopping to rate trees at ten points evenly spaced across the polygon. At each point, rate the two closest canopy trees. Summarize field data and record observations on page 2.
