

Landmarks between 3040 ft. Knob and South Summit of DBR

NO correlation between landmarks 1970 & 1995

290-111

From p 290-12 5/31/70

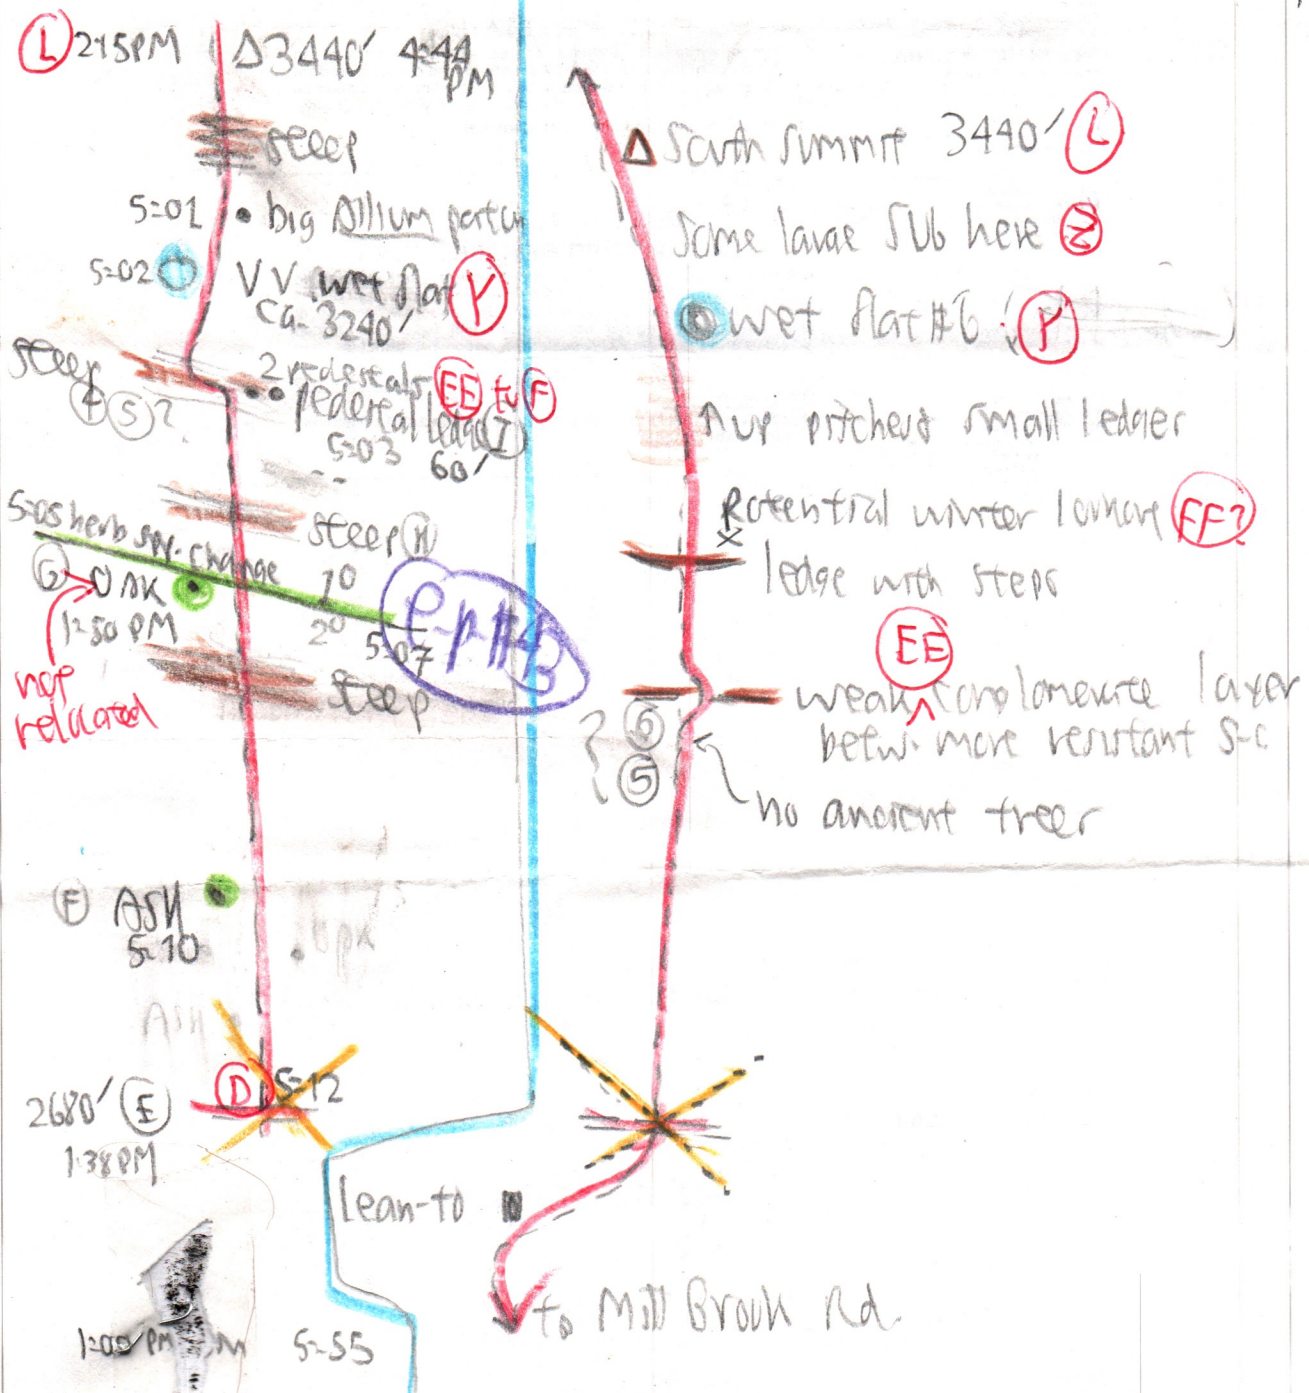

p-29035: 1:27 up  
5/9/95 from road to S Summit

from p. 290-31

no barometer carried

no barometer carried

Lettered sites are from 7/25/08 field notes pp

e-p#43

298-112

The 5/31/70 elev estimate of 3006' is fine! How was it done without a barometer? Current measurement is 3001'. Let the 1970 estimate stand!!

This Snickers wrapper fragment was found at lunch rock, in fern glade W of South Summit on 7/25/08. Accidentally left there by MK on 6/31/08!
