Spring flowering herbs on German Hollow Trail

Abundant: Dicentra canadensis (not cucullaria) in flower at 2500' but in fruit at 2000'; Viola canadensis, Viola blanda, Uvularia sessilifolia, Hydrophyllum virginianum, Dentaria diphylla (not laciniata), Arisaema, Claytonia caroliniana (but NOT virginiana).

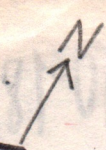

Occasional: Innillium undulatum erectum. Viola pubescens, Ranunculus abortivus, Anemone quinquefolia commonest below Pakatakan junction. Medeola, Viola papilionacea around 2500 ft. spring area, Tiarella, Luzula acuminata just below Pakatakan Junction, Erythronium.

One cut black cherry to clear trail above the 2500' spring. Tree #2 18" DBH, 60-70 yrs. At Pakatakan junction, the leaves are only $\frac{1}{4}$ - $\frac{1}{3}$ open, while at 1500' they are $\frac{1}{2}$ to $\frac{2}{3}$ expanded. Claytonia c. & Viola blanda abundant.

Fruiting Heterophyllum haldanianum luxuriantly covering a log beyond (S of) Lophozia^{ocum} ledge. Cinna abundant. Panax in trail dip area and around 2nd Wet Flat; Vib. aln in flower nearby.

Carex folliculata leaves are almost as wide as C. plantaginea's, but longer. At the wet flat #2, Coptis, Maianthemum evergreen, Vacc ?, ferns all brown & dead; Cinnamon fiddle 6" high. Trees only in bud, first breaking dormancy - red maples & MB's. Erythronium. Some sugar maples 24" on better-drained sites.
