Till Depth
 On Woodland Valley Campsite $> 48"$
 $24"$ cut on trail below "B"
 Intermittent runner from W to E:
 (none on ledge)
 3ft, 4ft, 6ft.
 7ft, 8ft
 Highest ASH at "I"
 8ft, 10ft close together
 At "K", cakes $24"$ thick on
 2 huge SUGS.
 Shallow soils in burn area,
 with ledges
 Cakes at 2300' are $18" \times 22"$ with lens
 3ft of till over ledges above "G"
 $> 30"$ till in Cascade area "H"

$1.21" \Delta p = 1216$ ft.
 $0.995" / 1000$ ft.
 OR $1.000" / 1005$ ft.

Vegetation
 2 pages
 ← back on p 150-5

From Campsite ground
 3.2 miles to Terrace Leanto
 3.4 miles to Wittenberg
 2.3 miles to JUNC at 2677'

← 1st growth →

Vegetation:

new trail up Terrace Mtn.
Also see 2 pages on →

150-5

6/10/84

BASSWOOD to "C", 1652 ft.

some to 36" DBH! Ilex montana, RM infruit.

RED OAK, HAMAM + BB at

1883 "D" lookout. Ilex mont + BC.

OST at 2000'

ASH 20" at 2000'

ASH at Cascade.

Highest ASH at "I", 2596'

Beech aments on ground above "G"

Trail base to Booth:

Hem to 33", SUG to 36" BASS 36"
between "A" & "C". Then smaller
trees until after "G".

Nil grand cover from "B" to "C",
a good place to study fragmenting
ledges. The new trail over
bouldery terrain is hard to follow
without markers.

HEMS to 28" at "E" also.

In FIRST GROWTH area from before "H" to "L" (DBHs):

SUG 36", >30", >24" DBH

B to 18" DBH

HEMS 28", 30" dead, + 30", 27" DBH

PB 30" DBH

ASH just w of Cascade, 2 trees 22" DBH

Grand cover in old growth:
\$, LL, MO, Vrot, UVUL, Aris,

At Cascades: little LAP, PA,
DICENTRA, DENTARIA

Must be 1st growth, as no bank
wad could cross a series
of intermittent ravines
like this foot trail (i.e.
no grading).

PB in bum area at several grand lookout "G"

Several large hemlock (to 28") ^{just} above lookout "G" with OX,
but hardwoods don't reach old growth size (trees)

Closer to "H".

Bum area:

Spruce saplings healthy except only for aphid galls

RM surrounds "Blueberry Consolomerate" + Hamam, DP,

Ilex mont, some RM infruit. Trees to 30' tall.

SPR-HEM-PB grow in crevices in open area. Azalea in fl.

OX in fl.

→ "Blueberry Consolomerate" could be photographed.
