

513-3

Escarpment N of Otis Summit

8/2/88

Ontario
Park Field
Trip

* Conglomerate has artz + red SS pebbles.

No evidence of Cable Ry. at Lumber Camp. Coal (charcoal?),
 old metal pipes + other debris present. Could Mulholland
 be mistaken that this Camp was the RY head? (Could
 this be instead, the foot, the logs being lowered down the N Mtn. escarpment?)

Revisit to explore further

burned area: PB, OAK, Klat, Cortis, (B) ATM
