

Blue stone Quarry missed on 9/14/07.

121-15

Issue I.D #:

7/2/08

- 2 mature + 2 tulip seedling

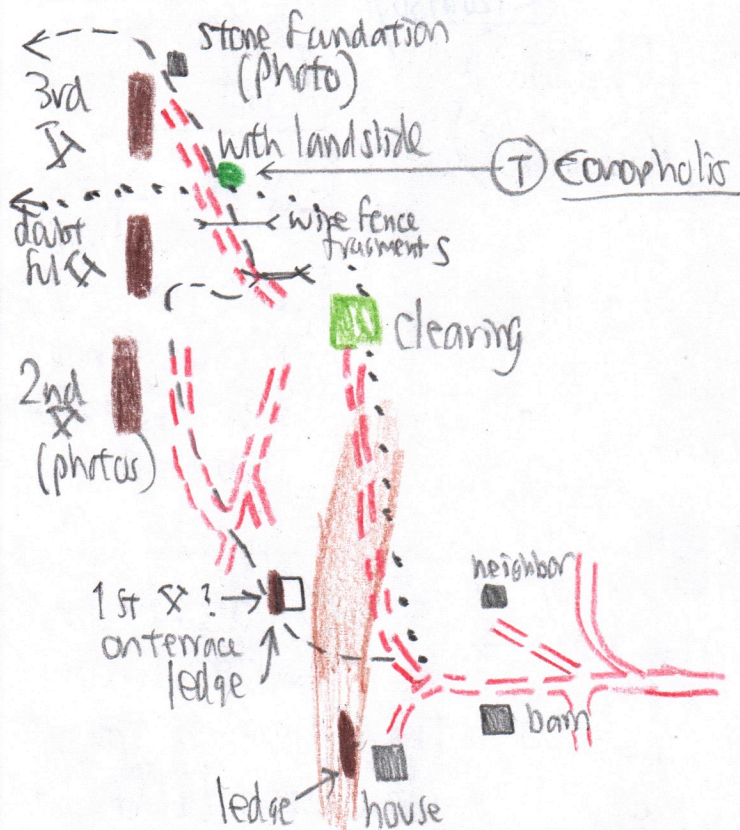

RM, HEM, BB, PB, ASH, SNAG below
swamp + down to houses.

All young (<100y).

Wire fence fragments suggest
passage almost up to the
quarry.

Monotropa beneath under
HEM RM, BB & PB
Conopholis under oak

} on
E slopes,
not on
crest.

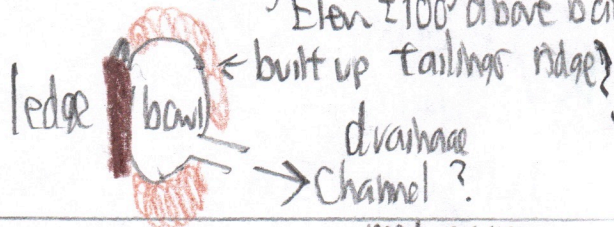

#3 quarry had a landslide
in summer 2007 heard by
Tom (?) on a clear day.

Elev
±130'
above
barn

Look up ancient dates of
quarry, if possible

The 1st quarry is small, with
a bowl below it, drained
through a ^{tailings?} ridge by a channel.
Elev ±100' above barn.

Asplenium trichomanes ^{midway up} on highest
ledge below crest.
