

Haynes Hollow to Sid's Nitch

from memory, with John Van Benschoten

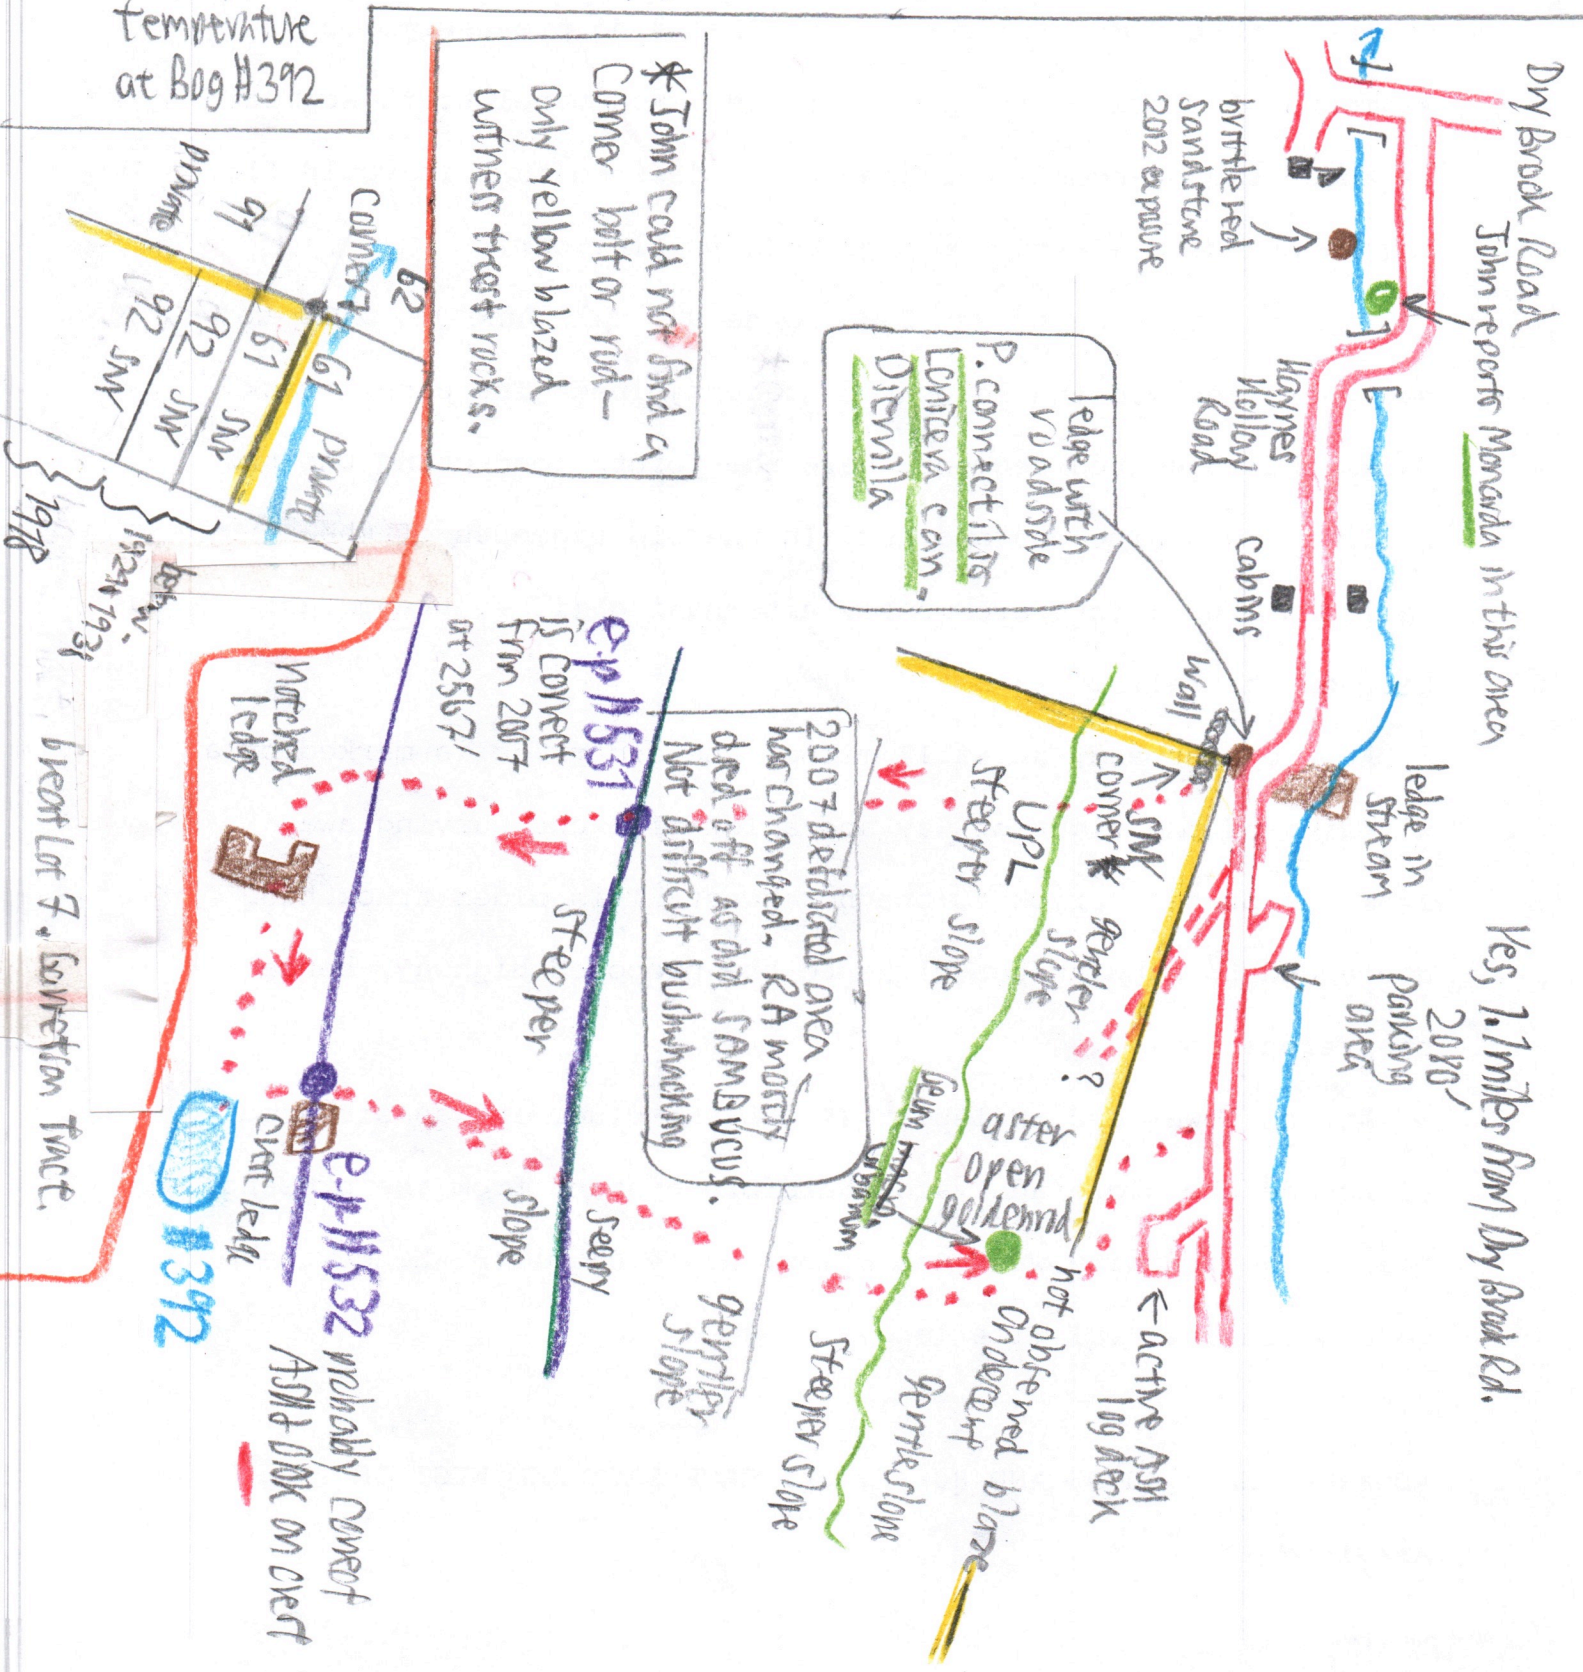

8/6/17 to measure basal peat temperature at Bog #392

* John could not find a Corner bolt or rod - Only yellow blazed witness tree trunks.

ledge with vada side
P. connectilis
Lonicera can.
Diplopoda

2007 degraded area has changed. RA mostly dead off as did SAMBYCUS. Not difficult bushwhacking.

Yes, 1.1 miles from Dry Brook Rd.

breast lot 7. Conservation tract.

1978

between 1929 & 1931

matched ledge

ep 11532 probably convert ASH + DRX on crest

#392

ep 11531 is convert from 2007 at 25671

steep slope
