Interactive Learning Strategies for the “Flipped Classroom”

**May 9:** Rebecca Blanchard
Student Assessment
This session will be held in HSRF 300

**June 13:** William Jeffries, PhD
Active Techniques for Assessment in the Flipped Classroom
Learning in context, clinical decision making, self-directed learning, asynchronous teaching, etc., etc. We've heard the buzz words of new approaches to clinically-oriented teaching and testing, but how do we as instructors learn to apply these skills? This webcast series will provide how-to sessions on some of these approaches. Developing focused clinical cases for teaching may not be intuitive for non-clinicians or clinicians. Our first session will introduce and illustrate how basic and clinical principles of disease and treatment can be constructed into clinical cases for lectures, PBL/TBL sessions and NBME-style exam questions.

**Sep. 12: Chuck Eldridge**

Learning in Context: Developing Case Scenarios for the Preclinical Curriculum

**Sep. 19: Mary T. Johnson**

Script Concordance Assessment of Clinical Reasoning in Medical Students, Five Years Out

**Sep. 26: Arno M.M. Muijtjens**

Progress Testing - concept, history, and recent developments

**Oct. 3: Robert Noiva & Douglas Gould**

Challenges and Opportunities of Independent Learning

**Oct. 10: Katherine Chretien & Marti Grayson**

Social Media Competencies for Medical Educators
