- A cow’s respiration (breathing) rate should be 10 to 30 per minute. It is subject to body size, age, exercise, excitement and fullness of digestive tract.
- Her pulse should be 60-70 beats per minute. You can feel this on her jaw or the muscle of her tail.
- The temperature of a cow is 101.4. You should always carry a digital thermometer in your show box and use it if you feel your animal is not feeling good.

CMT means micro or parts per million T F
Diarrhea can be caused by coocidian T F
Carbohydrates are length of milking T F
Rumen is a main source of energy T F
Forages are roughage T F
Concentrates are a primary source of antibodies T F
Colostrum is cereal, protein and vitamins T F
Body condition tells nutritional needs T F
Lactation is scours T F
TMR is different feeds mixed together T F
