1. What is the temperature for a healthy goat? _____
 2. What is the normal Pulse rate? _____
 3. What is the normal respiration rate _____
 4. What is the Estrus/Heat Cycle? _____
 5. What is the Gestation for a goat? _____
 6. At what age do most goats reach their full size? _____

What do goats eat?

Goats are herbivores (plant-eaters) who spend most of the day grazing. Goats eat grass, herbs, tree leaves and other plant material. Goats swallow their food without chewing it much. Later, they regurgitate the food (then called a cud) and chew it thoroughly before swallowing it for the last time.
