DAIRY ACTIVITY SHEET

Page 6

- Have a club activity and make some ice cream and butter and then sample what you make.
- Educate your friends and classmates about the benefit of dairy products.
- Make a poster for your fair to display in the Exhibit Hall or with your animals.

Created by Martha Seifert 2020

Making Butter: Place cream in a jar along with a clean marble. Screw the lid on & make sure it is secure.

Ahake the jsr in an up & down motion. At first you will hear the marble moving. Then there will be a time when the cream will be so thick the marble can’t be felt.

Suddenly the butter will form. Drain the butter through a strainer. Wash the butter with cold water to remove any trapped buttermilk, salt to taste & then pack it down.

Spread on crackers to sample. Refrigerate.
