Saturday, November 13, 2021, 5:00-7:00 pm
University of Vermont, Davis Center, Mansfield Dining Room
FREE pizza and drinks; Open to all youth in grades 7-12
Register@ www.uvm.edu/extension/youth/announcements
"Like" us @www.facebook.com/VTeen4HScienceCafe

Face Mask Requirements: Everyone is required to wear face coverings over their nose and mouth when inside UVM buildings, regardless of vaccination status. All users of UVM buildings must continue to monitor themselves for symptoms of COVID-19 and not come to campus, nor participate in UVM in-person activities, if they are experiencing symptoms or have tested positive for COVID-19 in the past 10 days.

Welcome to the world of microbiology where you'll take a closer look at what makes the bugs that we cannot see so dangerous. Through game play you will learn the various virulence factors of different bacteria, protozoa, and viruses that make them dangerous. You will also learn the most common antibiotics and antivirals used to treat them. And finally, you will have a competition between bugs versus drugs. So, come to this café to learn about virology, microbiology, bugs and drugs!

ABOUT OUR SPEAKER

Amanda Nattress is a multi-generation Vermonter who graduated in 2019 from UVM with a major in Biochemistry and a minor in Pharmacology and Nutrition and Food Sciences. She is currently a second-year medical student at the Larner College of Medicine (UVM) Class of 2024.

What is a Teen Science Café? It is a free, fun way for teens to explore science, engineering and technology with local scientists, engineers and technology experts. Teens participate in informal discussions and hands-on activities to learn about different topics. And, there is always free food! Planned and run by teens for teens.

Questions? Contact lauren.traister@uvm.edu

To request a disability-related accommodation to participate in this program, please contact the 4-H Office at 802-888-4972 or lauren.traister@uvm.edu by October 22, 2021 so we may assist you.
