Vermont Education at its Peak: Forging the Trails of Academic and Social Success

The BEST/MTSS Summer Institute provides opportunities for school teams of educators, family members, and community stakeholders to share and learn strategies for improving and strengthening the systems, data, and practices within a multi-tiered system of supports. Expect to learn about new programs, curricula, practices, and activities that emphasize positive, research-based strategies to support all of our students. Individual or team-attended strands and workshops are intentionally designed to complement afternoon school team planning for building an effective multi-tiered system of supports.
