

# What is the Vermont I-Team?

The Vermont Interdisciplinary Team (I-Team) provides training for teams working with students ages 3 to 22.

We envision a future where every child and youth in Vermont who requires intensive special education:

- is welcome in their class and community
- is taught well
- and has access to needed resources for a quality education.

Statewide collaborative support for Vermont children & youth needing intensive special education.

## HOW WE WORK:

Each of Vermont's five regions has its own educational consultant -- who provides extensive skill and knowledge to IEP and school teams -- and its own family resource consultant, who provides support to families through first-hand experience.

Our related service personnel team is comprised of therapists and specialists to assist families and students statewide.

## OUR MODEL:

The I-Team model promotes building the capacity of the local team based on identified outcomes.

We support teams with:

- Increased membership & participation
- Universal Design for Learning
- Person-centered planning
- Curriculum-based instructional planning
- Collaborative teaming & decision-making
- Augmentative Communication
- IEP development & implementation
- Family support

# Vermont I-Team

Belonging • Independence • Mastery • Generosity

## Request technical assistance

The student's case manager must complete a request for technical assistance form each year, signed by Local Education Agent (LEA) and by the student's parent/guardian.

## Book professional development

Training is available for school staff, families, community members, and community service providers.

Topics cover the education of students with intensive special education needs.
