Dear Graduates,

Today we recognize you and celebrate all you have accomplished during your time at UVM—the explorations and discoveries, academic milestones and personal achievements, and the lifelong relationships made with mentors and friends.

We hope that you sense the pride that all of us at the university feel as we celebrate you alongside your families and friends. We stand ready to watch you carve out your unique path in the world, and we know first-hand that you have much to offer. The passage of time will bring your moments here into sharper relief, and you will realize that the tools you used to succeed here—perseverance, focus, discipline, and commitment to community—*will* serve you well in life beyond UVM too.

Don't minimize the impact you will have on the world. Your contributions—large and small, daily and long-term, individual and collective—will make a difference. Simply put: you will make the world better.

A commencement celebration is an occasion for joy and for reflection. I hope today is full of both for you. As you step out on your next journey, and wherever the path leads, we know you will make your alma mater proud.

With all my best wishes,

A handwritten signature in black ink that reads "Suresh Garimella".

Commencement Speaker and Honorary Degree Recipients

SETHURAMAN PANCHANATHAN

Doctor of Science, *honoris causa*

Commencement Speaker

The Honorable Sethuraman Panchanathan is a computer scientist and engineer and the 15th director of the U.S. National Science Foundation (NSF). Panchanathan was nominated to this position by the President of the United States in 2019, and subsequently unanimously confirmed by the U.S. Senate on June 18, 2020. NSF is a \$9.5 billion independent federal agency and the only government agency charged with advancing all fields of scientific discovery, technological innovation, and STEM education.

Panchanathan is a leader in science, engineering, and education with more than three decades of experience. He has a distinguished career in both higher education and government, where he has designed and built knowledge enterprises that advance research innovation, strategic partnerships, entrepreneurship, global development, and economic growth.

As NSF director, Panchanathan maintains leadership roles on several key interagency councils and committees, including as co-chair of the National Advisory Council on Innovation and Entrepreneurship, and is a member of the White House CHIPS Implementation Steering Council and the White House Gender Policy Council. He is also chair of the Interagency Arctic Research Policy Committee and co-vice chair of the Council for Inclusive Innovation.

Panchanathan previously served as the executive vice president of the Arizona State University (ASU) Knowledge Enterprise, where he was also chief research and innovation officer. He was also the founder and director of the Center for Cognitive Ubiquitous Computing at ASU. Under his leadership, ASU increased research performance fivefold, earning recognition as the fastest-growing and most innovative research university in the U.S.

Prior to joining NSF, Panchanathan was appointed by the President to serve on the

National Science Board, where he was a chair of the Committee on Strategy and a member of the External Engagement and National Science and Engineering Policy committees. Additionally, he was chair of the Council on Research of the Association of Public and Land-grant Universities and co-chair of the Extreme Innovation Taskforce of the Global Federation of Competitiveness Councils. Arizona's governor appointed Panchanathan as senior advisor for science and technology in 2018. He was the editor-in-chief of the IEEE Multimedia Magazine and editor and associate editor of several international journals.

Panchanathan's scientific contributions have advanced the areas of human-centered multimedia computing, haptic user interfaces, and ubiquitous computing technologies for enhancing the quality of life for individuals with different abilities; machine learning for multimedia applications; and media processor designs. He has published close to 500 articles in refereed journals and conference proceedings and has mentored more than 150 graduate students, postdocs, research engineers, and research scientists, many who now occupy leading positions in academia and industry.

For his scientific contributions, Panchanathan has received numerous awards, including honorary doctorates from prestigious universities, Distinguished Alumnus awards, the Governor's Innovator of the Year for Academia Award, the Washington Academy of Sciences Distinguished Career Award, and the IEEE-USA Public Service Award.

Panchanathan is a fellow of the National Academy of Inventors, where he served as vice president for strategic initiatives. He is also a fellow of the American Association for the Advancement of Science, the Canadian Academy of Engineering, the Association for Computing Machinery, the Institute of Electrical and Electronics Engineers, and the Society of Optical Engineering.

A foremost scientist, engineer, and educator, Dr. Panchanathan's innovative, entrepreneurial approach to problem solving and his spirited way of empowering teams to tackle the grand challenges of our day make him an inspiring leader of consequence for the 21st century.

MICHELE RESNICK COHEN '72
Doctor of Humane Letters, *honoris causa*

Michele Resnick Cohen is a passionate arts advocate, philanthropist, and nonprofit governance leader whose vision of collaborative arts education is creating transformative experiences for students today and for generations to come.

The Cohen Hall for the Integrative Creative Arts, opened in 2018, is a testimony to Cohen's lifelong appreciation for the power of material expression and the act of making. The renovation of the historic Elihu B. Taft School on the edge of campus, made possible through the generosity of Michele Cohen and her husband, Martin, brought into form a revolutionary space for arts education at UVM. With studios, labs, and teaching spaces for fine arts and the performing arts, Cohen Hall for the Integrative Creative Arts is an incubator for interdisciplinary collaboration and creative cross-pollination among students and faculty working in traditional and emerging forms.

The granite and marble wainscoting, terrazzo floors, and high, arched windows of the 1939 Works Project Administration building have been thoughtfully restored and preserved. Now the building houses studio art classrooms, critique spaces, a gallery, a dance studio and performance space, an audio recording studio, and a digital media lab. The hallways showcase an ever-evolving exhibition of student work in traditional and digital media.

Cohen's commitment to arts education extends far beyond UVM. Since 2008 she has served on the board of the Museum of Arts and Design, a preeminent museum for 3D art and contemporary craft, and has led the museum's governance as chair of

the board since 2016. Since 2002 she has served on the Alfred University Board of Trustees, where Cohen chairs the Student Experience Committee. Among other investments her philanthropy has established Alfred's Cohen Center for the Arts, a transformative educational space that is home to the requisite foundations class for all incoming art students, and the Cohen Gallery, which showcases works by Alfred students, faculty, staff, visiting artists, and alumni and facilitates community-based projects. Her generosity is also making possible a new 10,000 square foot foundry for casting and fabrication. Like the Cohen Center for the Integrative Arts, these are unique, defining features for arts education at the school.

Cohen is a founding and current member of the UVM Foundation Board, which works closely with the UVM Board of Trustees and the UVM Alumni Association to continue building vibrant community in support of UVM.

Michele Resnick Cohen earned a B.S. in early childhood education from the University of Vermont in 1972 and an M.S. from Hunter College in 1976. After beginning her career as a nursery school teacher, she worked at Cohen & Steers Capital Management for 18 years until 2004, when she retired. She credits her parents for leading by example and cultivating within their family an ethos of sharing time and resources to support, strengthen, and continue evolving organizations that a person cares about and that impact life in meaningful ways. Cohen's vision and leadership are creating opportunities for students to deeply engage and collaborate in the often life-defining experience of exploring self-expression through material form.

MARK A. LEVINE
Doctor of Science, *honoris causa*

State Health Commissioner Mark Levine, MD has been leading Vermont's population and public health initiatives since his appointment by Governor Phil Scott in early 2017. His clarity of communication, confidence-inspiring demeanor, and reliance on data in creating and evolving public health

guidance have made him a widely recognized and respected leader across the state.

He did not seek this spotlight—in fact, it’s possible that most state health commissioners never expect to be widely known beyond their medical and political circles. But when the world was suddenly confronted by an unprecedented deadly pandemic in 2020, Dr. Levine became a reassuring voice for Vermonters at Governor Scott’s press conferences two to three times every week as he calmly presented evidence-based COVID-19 updates and straightforward public health guidelines.

Known for his diplomacy and his forward-thinking approach, Dr. Levine worked tirelessly coordinating with hospitals, colleges, and skilled nursing facilities, advising the governor on safely reopening all sectors of society and the economy, and meeting with policy makers, medical professionals, and the public to address concerns as the pandemic surged and ebbed. His deliberate, data-informed leadership helped mitigate the impact of COVID-19 in Vermont, keeping the number of coronavirus cases and deaths among the lowest in the country.

Levine received his B.A. in biology from the University of Connecticut and his M.D. from the University of Rochester. He completed his three-year internal medicine residency at UVM, where he also

became chief resident, and then completed his general internal medicine and clinical epidemiology fellowship training at the University of North Carolina. He spent 10 years at Geisinger Medical Center in central Pennsylvania before returning to UVM to teach, practice, and direct the training of hundreds of internal medicine residents.

Prior to his appointment as health commissioner, Levine was associate dean for graduate medical education and a professor of medicine at UVM, a position he still holds. The complex and often chronic health conditions seen by internal medicine practitioners sparked Levine’s interest in public health and in addressing causes and conditions at the population level. In fall 2020, the Vermont Medical Society honored Levine with its Distinguished Service Award for “his tireless work mitigating the impact of the COVID pandemic on all Vermonters.”

Dr. Levine is dedicated to improving health across Vermont. Through his steady leadership, data-driven practice, and policy work directed at prevention and health equity, Dr. Levine promotes a culture of health that has made Vermont a standout for its approach to optimizing population health and its vision of healthy citizens living in healthy communities.

Academic Regalia

THE ACADEMIC COSTUME worn today in U.S. colleges and universities is a survivor of the Middle Ages. The University of Vermont was among the first in this country to experiment with the use of academic gowns, requiring their wearing at the graduation of 1806. The experiment was not repeated until mid-century when UVM and other colleges began wholeheartedly to use the medieval scholar's clothing for ceremonial occasions.

The code regulating academic costume is administered by an intercollegiate commission that establishes uniform standards. **BACHELORS'** gowns have closed fronts and long, pointed sleeves. **MASTERS'** gowns may be worn open or closed and have oblong sleeves open at the wrist, the lower portion hanging down with an arc near the bottom. **DOCTORS'** gowns may be open or closed and have velvet facings and three velvet bars on the round, open sleeves. The facings and bars may be of black or of the official colors of the wearer's department of learning.

Hoods are usually black. All are lined in silk in the academic color or colors of the institution conferring the degree, with a chevron for additional colors. A University of Vermont hood is lined with green, with a gold chevron, the official school colors. The color of the hood border indicates the degree earned.

THE BLACK MORTARBOARD is worn for all degrees. Only Doctors' caps may be made of velvet and only Doctors or Presidents of institutions may wear a gold tassel on the cap.

THE CLASS OF 1927 MEMORIAL MACE is carried by the University Marshal at formal university occasions and is displayed on the platform during these ceremonies.

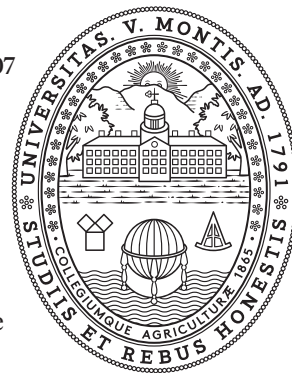

The Mace, a gift from the Class of 1927, is forty-seven inches long, cast bronze, plated in silver, with a black ebony handle. The sculpture on one of the four sides depicts the center section of Old Mill with Mt. Mansfield in the background, symbolizing the founding of the University. Other sides display three students reaching upwards to a lamp, symbolic of learning; the Ira Allen Chapel, symbolizing spiritual guidance; and a group of four persons, symbolizing friendship. It is crowned by the seal of the University.

The Mace was designed and the model sculpted by Richard Simpson, son of Carl G. and Doris Griffith Simpson, both members of the Class of 1927.

THE UNIVERSITY SEAL or Medallion was adopted in 1807 and used until 1871 when it was replaced by a round seal incorporating the name of the College of Agriculture. In 1975 the Board of Trustees voted to restore the original seal to official use, modified to incorporate the Latin name of the College of Agriculture.

The motto on the seal is from Horace, Epistles 1.2.36. Literally, it means "For virtuous studies and matters." In the allusion to Horace's poem it reflects UVM's continuing belief in the utility and practicality of all liberal studies.

Tune: Jane Oppenlander '79, G'81 | Text: David Cox '49

From the lofty peaks of Mansfield
to the shores of Lake Champlain,
comes a mighty swelling chorus,
whose echo will remain:

Vermont! Vermont! Vermont!
Our University!
Our hearts and minds and voices
sing in love and praise to Thee!

Vermont! Vermont! Vermont!
Our University!
Our hearts and minds and voices
sing in love and praise to Thee!

Shadows falling 'cross the campus,
changing seasons' wond'rous scene,
stir our thoughts of Alma Mater,
and the colors Gold and Green:

Vermont! Vermont! Vermont!
Our University!
Our hearts and minds and voices
Sing in love and praise to Thee!

Vermont! Vermont! Vermont!
Our University!
Our hearts and minds and voices
Sing in love and praise to Thee!
