Overview

CHEM 318C is a survey of the current literature for analytical/physical chemistry. The general objective is for students to present up-to-date literature that is, at most, only tangentially related to their fields, and to learn how to supply appropriate background to the audience, present the pertinent results, and make critical assessments on the validity of the results, the nature of the experiments, and/or on the relevance of the chemical literature.

Learning Objectives

1. To foster the good habits and practices of staying current on the latest trends and topics in analytical or physical chemistry through scholarly studies of the recent literature.
2. To improve the skills of oral communication in the context of science, with emphasis placed on presentation, discussion, Q&A, and the language of analytical or physical chemistry.

Course Philosophy

Each of us approaches science with a different perspective informed by our personal upbringing, educational background, socioeconomic status, racial identity, ethnicity, and gender. My goal is to create a classroom environment that supports students from all diverse set of backgrounds. I strongly believe that our best path forward to making scientific progress is to promote inclusiveness and equality. It is my expectation that every member of this class will also support diversity and inclusion. As a community, we should strive to uphold the ideals of Our Common Ground and welcome any suggestions as to how we can promote a more diverse and inclusive classroom.

Course Format

Modality Description

Microsoft Teams will be used for this course. Please meet with me if this will be a problem for you, especially if you have an unreliable internet connection.

Selection of Papers

You may choose any paper in the current (within the last 12 months) analytical and/or physical chemistry literature. A pdf copy of the paper that will be discussed must be distributed to all members of the analytical and physical divisions at least two days before the scheduled presentation. The paper that you select must be approved by both yourself and your advisor at least two weeks prior to the presentation. It is not recommended that you select a paper that focuses purely on development or sensing applications, unless it is exceptional in its scientific impact and quality. It is highly recommended that you choose a paper with a clear scientific problem/hypothesis from high impact, high quality journals such as those listed below:

- Science
- Nature
- Nature Chemistry
- Nature Nanotechnology
- Nature Communications
- Nature Photonics
- JACS
- PNAS
- Nano Letters
- ACS Nano
- ACS Photonics
- Chemical Science
- Angewandte Chemie
Students can also select papers from more specialized journals, but they should ensure along with their advisor that the paper is of sufficient quality and broad appeal to be appropriate for the audience attending seminars. Potential specialized journals are listed below.

- ACS Chemical Neuroscience
- ACS Sensors
- Analytical Chemistry
- Analyst
- Journal of Physical Chemistry A/B/C/Letters
- Journal of Chemical Physics
- ChemComm,
- PCCP
- Crystal Growth & Design

**Presentation**

Presentations should be brief and informative (ca. 5-25 slides or 25 minutes, at least 10-20 minutes for questions). You must include the complete citation, authors' names, and article title. You should supply appropriate background to the audience, present the pertinent results, and make any critical comments on the validity of the results, the nature of the experiments, or on the relevance of the chemical literature. Presentations must be completed a week prior to the seminar talk and the slides must be sent to me for review. Please note that students will still be permitted to change their presentation in the week prior to their seminar talk. Finally, it is highly encouraged that you practice your presentation with your colleagues and/or advisor prior to giving your seminar talk.

**Discussion**

As presenter, your job is to moderate the discussion. One way to open discussion is to pose one or two open-ended, but specific questions to the audience. Attendees are expected to be active participants in the discussion, ask questions, raise alternate viewpoints, and mention other related literature. The preparation of these presentations should not be excessive, but the expectation is that you will be reading the original article and sufficient/appropriate number of other papers (roughly 4-10 papers) to develop a good understanding of the immediate field of the paper. You are expected to briefly summarize the paper. The majority of your presentation should be a critical analysis of the paper in which you guide the discussion.

To help facilitate scientific discourse, students are strongly encouraged to ask questions and provide critical commentary on the paper being discussed. For every seminar talk, two random students who are not presenting will be asked to pose a question or provide commentary. Please be prepared to ask a question for every presentation so that you are not caught unprepared.

**Grading and Evaluation**

Following faculty discussion, speakers will receive a grade of Satisfactory or Unsatisfactory. Seminars will be evaluated on the following points:

- Do you identify the scientific problem being addressed in this paper? Do you identify the novelty (i.e., hypothesis, scientific results, device, etc.) that the paper contributes to the field? Please be sure to provide context for this by citing previous and contemporary literature that also addresses a similar or the same scientific problem in the field.
- Do you identify the central hypothesis (explicit or implicit) of the paper? What previous literature precedes or supports experimental data on the paper lead to the formation of the hypothesis of the paper?
- Do you provide a critical analysis of the experiments and methods used in the paper to address the overall scientific problem and hypothesis being examined? Do you discuss what control experiments the authors perform? How do the methods used in the paper compare to alternative techniques? What are the advantages and disadvantages of the techniques compared to other methods? Please cite examples from the scientific literature to contextualize your response.
- On the basis of the findings of this paper, what future directions or new scientific problems do you anticipate can be pursued? Do you explain why these new scientific problems are interesting for the field?
- Do you use appropriate language and have a polished oral presentation style when presenting? Do you describe concepts in a non-casual, vernacular?
**Excused Absence Policies**

- **Religious Holidays:** Students have the right to practice the religion of their choice. If you need to miss class to observe a religious holiday, please submit the dates of your absence to me in writing by the end of the second full week of classes. You will be permitted to make up work within a mutually agreed-upon timeframe. [https://www.uvm.edu/registrar/religious-holidays](https://www.uvm.edu/registrar/religious-holidays)

- **Inter-collegiate Athletics:** Members of UVM varsity and junior varsity teams are responsible for documenting any conflicts between their planned athletic schedule and their class schedule by the end of the second full week of classes. You will be permitted to make up work within a mutually agreed-upon timeframe.

- **Medical and Emergency Absences:** Absences due to sickness, as well as medical and family emergencies, should be brought to my attention as soon as possible. You will be permitted to make up work within a mutually agreed-upon timeframe.

- **Other Absences:** Absences due to extracurricular or other activities not specified above should be brought to my attention as soon as possible. You will be permitted to make up work within a mutually agreed-upon timeframe.

**COVID-specific Policies**

The University of Vermont reserves the right to make changes in the course offerings, mode of delivery, degree requirements, charges, regulations, and procedures contained herein as educational, financial, health, safety, and welfare considerations require, or as necessary to be compliant with governmental, accreditation, or public health directives.

**Email Policy**

Students are encouraged to email me directly to clarify any questions they may have in the course. The subject line of emails should only contain the words “CHEM 318: Current Topics in Chemistry.” Emails will be filtered using this subject line to ensure that they are not mistakenly missed. I will only respond to emails that do not contain these words in the subject line. Unless there is an emergency, I will generally only answer students’ emails twice a day, around 08:30 and 18:30.

**Recording Policy**

Our class sessions may be audiovisually recorded for students in the class to refer back to and for enrolled students who are unable to attend live. Students who participate with their camera engaged or utilize a profile image are agreeing to have their voices or image recorded. If you are unwilling to consent to have your profile or video/image recorded, be sure to keep your camera off and do not use a profile image. Likewise, students who unmute during class and participate orally are agreeing to have their voice recorded. If you are unwilling to consent to have your voice recorded during class, you will need to keep your mute button activated and communicate exclusively using the “chat” feature, which allows students to type questions and comments live.

**Important University Policies**

**Academic Integrity**

Offenses against the Code of Academic Integrity are deemed serious and insult the integrity of the entire academic community. Any suspected violations of the code are taken very seriously and will be investigated by the Center for Student Ethics and Standards. Violations of the Code of Academic Integrity—including any inappropriate collaboration, collusion, cheating, or plagiarism, or any other related offense—will be fully investigated according to the rules set by the UVM Academic Integrity Office and may be punishable with a score of zero for the assignment in question. Details can be found at [http://www.uvm.edu/policies/student/acadintegrity.pdf](http://www.uvm.edu/policies/student/acadintegrity.pdf).

**Grade Appeals**

If you would like to contest a grade, please follow the procedures outlined in this policy: [https://www.uvm.edu/policies/student/gradeappeals.pdf](https://www.uvm.edu/policies/student/gradeappeals.pdf)

**Code of Student Conduct**

[http://www.uvm.edu/policies/student/studentcode.pdf](http://www.uvm.edu/policies/student/studentcode.pdf)

**FERPA Rights Disclosure**

The purpose of this policy is to communicate the rights of students regarding access to, and privacy of, their educational records as provided for by the Family Educational Rights and Privacy Act (FERPA) of 1974. [http://catalogue.uvm.edu/undergraduate/academicinfo/ferparightsdisclosure/](http://catalogue.uvm.edu/undergraduate/academicinfo/ferparightsdisclosure/)

**Promoting Health and Safety**
The University of Vermont’s number one priority is to support a healthy and safe community:
Center for Health and Wellbeing https://www.uvm.edu/health
Counseling & Psychiatry Services (CAPS): Please call 802-656-3340 for assistance.
C.A.R.E. If you are concerned about a UVM community member or are concerned about a specific event, we encourage you to contact the Dean of Students Office (802-656-3380). If you would like to remain anonymous, you can report your concerns online by visiting the Dean of Students website at https://www.uvm.edu/studentaffairs
Alcohol and Cannabis Statement
As a faculty member, I want you to get the most you can out of this course. You play a crucial role in your education and in your readiness to learn and fully engage with the course material. It is important to note that alcohol and cannabis have no place in an academic environment. They can seriously impair your ability to learn and retain information, not only in the moment, but up to 48 hours or more afterwards. In addition, alcohol and cannabis can:
• Cause issues with attention, memory, and concentration
• Negatively impact the quality of how information is processed and ultimately stored
• Affect sleep patterns, which interferes with long-term memory formation
It is my expectation that you will do everything you can to optimize your learning and to fully participate in this course.

Student Resources
Technical Support for Students
Students, please read this technology check list to make sure you are ready for classes. Students should contact the Helpline (802-656-2604) for support with technical issues.
Research and Citation Help
For help selecting research topics, finding information, citing sources, and more, ask a librarian. Although they are working remotely, librarians are always eager to help. You may ask questions by phone, e-mail, chat, or text, or make an appointment for an individual consultation with a librarian.
• Howe Library: https://library.uvm.edu/askhowe
• Dana Medical Library: https://dana.uvm.edu/help/ask
• Silver Special Collections Library: https://specialcollections.uvm.edu/help/ask

Student Learning Accommodations
In keeping with University policy, any student with a documented disability interested in utilizing accommodations should contact SAS, the office of Disability Services on campus. SAS works with students and faculty in an interactive process to explore reasonable and appropriate accommodations, which are communicated to faculty in an accommodation letter. All students are strongly encouraged to meet with their faculty to discuss the accommodations they plan to use in each course.
Contact SAS:
A170 Living/Learning Center
802-656-7753
access@uvm.edu
https://www.uvm.edu/access

Diversity, Equity, and Inclusion Resources
The Division of Diversity, Equity, and Inclusion Center believes excellence should be inclusive of the entire University of Vermont (UVM) community and is steadfastly committed to this belief. Every day, our Division strives to make our work accessible, affirming, and action-oriented to help ensure excellence is inclusive of everyone.
https://www.uvm.edu/diversity

UVM Prism Center
The Prism Center serves the diverse queer and trans communities at the University of Vermont. We support and empower lesbian, gay, bisexual, transgender and queer students, as well as students whose identities fall in between or expand beyond those categories, and work to create a campus community where people of all sexual and gender identities can thrive.
https://www.uvm.edu/prism

Interfaith Center
Each of us engages those questions differently, perhaps through a religious tradition, philosophy, or spiritual practice. No matter how you make meaning of your life, you are welcome at the Interfaith Center for reflection, spiritual practice, education, and community building.

https://www.uvm.edu/interfaithcenter

Mosaic Center for Students of Color (MCSC) Vision is to create a diverse and rich community of empowered, engaged, and enthusiastic students of color at UVM. We fully support the holistic development of self-identified students of color so that they can obtain their goals for academic achievement, personal growth, identity formation, and cultural development.

https://www.uvm.edu/mcsc

Women & Gender Equity Center

The UVM Women & Gender Equity Center cultivates joyful community while advancing gender equity across identities. We envision a brave, diverse, and equitable learning environment for all members of the UVM community. We provide advocacy services for those in our community who have experienced sexual or intimate partner violence, and strive to provide programming, education, and events that ask our community to explore the intersections of their gender and other identities.

Tips for Success

Students are encouraged to attend class, do homework, come to office hours, work with peers, and ask questions to help them succeed in class. In case the course goes fully online, there are a few resources for students on remote/online learning:

- Checklist for Success in: https://learn.uvm.edu/about/support-for-students/checklist-online-credit-courses/
- Academic Support for Online Courses: https://www.uvm.edu/academicsuccess/online-learning-student-resources-remote-instruction/

Helpful resources other than the instructor include the Undergraduate/Graduate Writing Center, Supplemental Instruction, Learning Co-op tutors, and supplemental course materials.
Course Schedule (TBD)
