EC 2 _____

EC 2 _____

EC 2 _____

Honors theses

Students wanting to write honors theses for College Honors in their senior year should take the relevant preparatory courses by the end of their junior year. For many, this will mean taking Econometrics EC 200 in the Fall semester of their junior year. But they should also take other relevant courses as well (trade, labor, etc., depending on area of interest). Students who will not do an empirical thesis should take other advanced courses by the end of their junior year as well. They should be advised to have a topic, advisor and plan of action by the end of their junior year and work on the proposal over the following summer.

Department honors

Students wanting to apply for Economics Department Honors do so in the Spring Semester of their senior year. To apply, submit the best research paper written for an Economics course, with a cover essay. Such students should start 200-level coursework early.
