

Fall 2019

Geology Seminar Series

Fall Semester 2019

Monday in Delehanty Hall 219 at 4:15PM

09/30/2019 Marc Caffee, Department of Earth, Atmospheric, and Planetary Sciences, Purdue University, IN:

"Complex Planetary Surface Processes: Accelerator Mass Spectrometer Radionuclide Measurements from Terrestrial, Lunar, Martian, and Asteroidal Materials"

Attention, this lecture is on a Thursday at 4:30 PM in the Ira Allen Chapel!

10/10/2019 Michael Mann, Earth System Science Center, Penn State University, PA:

"A Return To The Madhouse: Climate Change Denial in the Age of Trump"

Attention, this lecture is on a Thursday at 4:30 PM in the Carpenter Auditorium!

10/24/2019 Andy Revkin, former NYT climate writer and blogger:

"The North Pole Was Here, A journalist's quest for communication impact from the melting North Pole to the overheated media climate"

10/28/2019 Kristina Walowski, Department of Geology, Middlebury College, VT:

"Pre-eruptive storage, evolution, and ascent timescales of a high-Mg basaltic andesites in the southern Cascade Arc"

11/04/2019 Beck Strauss, National Institute of Standards and Technology:

"The Case of the Missing Dynamo: Constraining the decline of the Moon's magnetic field using Apollo 12 basalts"

11/11/2019 Rebecca Diehl, Department of Geography, University of Vermont, VT:

"Insights into controls on floodplain sediment deposition over multiple scales, from the leaf to the watershed"

11/18/2019 Bill McDowell, Department of Natural Resources and the Environment, University of New Hampshire, NH:

"Calibrating ChemCam: Probing Mars Chemistry at Arm's Length"

Sponsored by the Department of Geology Visiting Lecture Series
