We learned about igneous, sedimentary, and metamorphic rocks!
We learned about minerals!
We even collected our own rocks and made pet rocks!
We played games and read science books!
We made edible rock formations!
We took a walk to Centennial Woods!
We played in the stream...
And investigated the soil layers!
We explored the Perkins Museum!
We decorated pots and planted seeds in them!
We created volcanoes, and even made them explode!
We explored the wetlands!
These were our science camp teachers!
We had tons of fun!

Enjoy the rest of your summer!
