

Student Requested Placement Change

Students may request a change in placement if for any reason they believe there will be significant challenges or barriers toward the completion of the learning objectives put forth in the Field Experience/Practicum syllabus.

Although every effort is made to ensure a successful experience, unforeseen difficulties sometimes do arise and the Field Education Coordinator will explore these thoroughly with the student, Field Instructor and Faculty Field Liaison. After one or several conferences with the Faculty Field Liaison and the student, the Field Education Coordinator will make the final decision about a possible placement change (and the circumstances to follow).
