Overview

The Requisitions function in PeopleSoft Financials enables employees and procurement professionals to manage the purchasing of goods and services for the University. PeopleSoft Financials also contains related information including supplier records (previously called vendor records), payments, billing, budgets, and more.

Authorized requesters enter Requisitions in PeopleSoft in advance of a purchase. Purchasing Services then creates a purchase order in PeopleSoft, based on the requisition. Purchasing Services sends the purchase order to the supplier as an authorized university order, with a copy forwarded to the requester.

A requisition creates a pre-encumbrance against the chartstring provided, reducing the available budget balance. Creation of the purchase order clears the pre-encumbrance and creates an encumbrance; the budget balance remains the same. Payment of the invoice clears the encumbrance and creates an expense.

Create a Requisition

1. Log in to PeopleSoft Financials
2. Navigation: Main Menu > eProcurement > Requisition
3. Click Requisition Settings.
4. When the **Requisition Settings** page appears, verify the following:

- **Business Unit** is UVM01
- **Requester** user ID is correct
- **Currency** value is USD
- **Ship To** location is correct (if you need to change the **Ship To Location** and the value you need is not in the search list, add the address information in the line **Comments** field (See Step 27 below for instructions on adding line comments)).
- **Accounting Defaults** (**Chartfields2** and **Chartfields3** tabs) are correct; do not change them on this page.
- In the **Requisition Name** field, enter a meaningful name for the requisition. This will make searching for the requisition easier in the future. *If left blank, the system inserts the Requisition ID here upon saving, which is not recommended.*

Click **OK**.

*If your requisition defaults are not correct, enter a **Footprint** for assistance.*
5. Click the **Special Requests** link.

6. Enter specific item or service information in the **Item Description** field (e.g., Item #12345 Large Oval Wooden Conference Table). Requisitions with insufficient descriptions will be returned to the requester for revisions (e.g., only supplier’s name entered, miscellaneous supplies, requisition #, etc.).

7. Enter the price of the item in the **Price** field (e.g., 123.50).

8. Enter the number of units to order in the **Quantity** field.

9. Enter the unit of measure in the **Unit of Measure** field, or click on the search icon to find the unit. If the requested item’s unit of measure is not listed, use each (EA). Most commonly used units of measure:
   - BOX – Box
   - CS – Case
   - EA - Each
   - LOT – Batch Lot
   - MO – Month
   - PAK – Pak
   - SET – Set
   - UNT – Units
10. Click the **Category** field search icon.

11. As of FY18, there is an improved category code list in PeopleSoft. Many codes have been inactivated, clearer descriptions are provided, and most importantly, the “Account Number” is available in the description field for easier searching.

On the Look-Up Category page, ensure the Search By is set to **Description** in the dropdown menu. Enter account number or key words, then press **Find**. Click the **Description** label at the top of the column to sort the list for easier viewing.

*Please note: Beginning FY18, the Category Tree/Category Folders are no longer a means for searching categories.*

**Look Up Category**

![Search Categories](image)

12. Click on the category to select it for use in your requisition.

13. Verify that the correct category is now in the Category field of the Item Details section.

14. Click the search icon to the right of the **Supplier ID** field.

15. Enter the desired Search parameters in the **Supplier Search** screen.

   Click **Find**. The more characters entered, the more refined the search. Searching by Name produces results that contain the name entered.
16. Select the appropriate supplier by clicking the radio button to the left of the appropriate **Supplier ID**. At the bottom of the screen, press **Select**.

17. Verify that the selected supplier’s name and id are now in the appropriate fields of the **Supplier** section.

18. If the desired supplier is not found, click the **Suggest New Supplier** link. Enter the required information about the new supplier and click **OK**.
Note: A field with an asterisk (*) is a **required** field and must be completed.

19. Attach a New Supplier W-9 form or IRS W-9 form to the requisition (as described in Step 25 below). New supplier requests will be reviewed and processed along with the Requisition.

20. The **Due Date** field is **not** used by Purchasing Services and is not required. Requisitions are processed on a first come, first served basis.

21. The **Blanket PO Dates** field is used with Blanket Purchase Orders. See page 15 for instructions specific to **Blanket PO creation**.

22. The **Request New Item** section is not in use.

23. When the necessary item information has been entered, click **Add to Cart** to place this item on the requisition.
Note: The **Shopping Cart** on the right side of the screen displays a high-level running total of the items entered on the requisition.

If you have additional items to order from the same supplier, repeat steps 6 through 23 to add the items to the requisition. **ONLY ONE SUPPLIER** can be used in each requisition.

24. Click either **Checkout** button.

25. In the **Requisition Name** field, verify or update the name entered in step 4.
26. Review the Cart Summary to ensure the items and quantities are accurate. To remove one line from the requisition, click the Trashcan icon to the far right of the line. For multiple line deletion, click the checkbox to the left of the line items, then click Delete Selected link below the items.
27. Click the icon to expand the requisition line details. Review the Ship To Address and select a different one if necessary. If the location you need is not in the search list, click the Comments bubble and add the address information on the Line Comment page, shown below. You can also include comments for the supplier or Purchasing Services here.

To have your comments print on the purchase order, check the Send to Supplier box.

28. Attach required documents to the requisition by clicking Add Attachments.

Example of documents that may be required as attachments on requisitions are:
- Quotes, Estimates
- Contracts, Agreements, Terms & Conditions
- Quotation Evaluation Form or Single Sole Source Justification Form
- Employee vs. Independent Contractor Determination Form
- New Supplier W-9 Form or IRS W-9 Form

29. Click Choose File, browse and select the file to attach, click Upload, then click OK to attach the file to the requisition. Multiple documents can be attached, by uploading one at a time.
30. Click the icon to expand the Accounting Lines. On the Chartfields2, review the Chartfield values to which this requisition item will be charged and change, or split if necessary.

**Note:** DO NOT change the value in the Account field. The system derives the Account value based on the Item Category. To change the Account, go back and change the Category code.

31. To split the item cost between multiple chartstrings, add distribution line(s). Click the sign to the far right of the Accounting Line to create another line.
To change how the expenses are distributed, click the **Distribute By** dropdown, and select **Qty** (Quantity) or **Amt** (Amount). Select the method to use to allocate the expense account distribution.

Selecting either option enables you to distribute by percentage. If you change the amount or quantity, the percent is adjusted. If you change the percent, the amount or quantity is adjusted. In either case, the total must equal 100 percent.

**Amount**: Select to enter a value in the Amount field. The sum of all distribution amounts must equal the schedule amount (the value in the Amount field on the Maintain Requisitions - Schedule page).

**Quantity**: Select to enter a value in the Req Qty field. The sum of all distribution quantities must equal the schedule quantity (the value in the Req Qty field on the Maintain Requisitions - Schedule page).

Enter the **Quantity** values or **Percent** values accordingly.

Update the values in the chartfields on the **Chartfields2** tab as needed. Repeat for all requisition lines.

Repeat steps 26-31 for all requisition lines.
32. When review is complete, click **Save & submit** on the bottom left of the screen.
33. On the **Confirmation** page, click the **Check Budget** link or icon.

34. Verify that the **Budget Status** is valid. In the event of an error, click the **Error** link to see a description of the budget error. Correct the error, and repeat the budget check process.

The type of error generated will depend on the fund being used in the chartstring:

- A **no budget exists** error means that a budget for that chartstring is required but does not yet exist. A budget needs to be created for that chartstring to be used in a transaction.

- An **exceeds budget tolerance** error means that the transaction exceeds the established budget for that chartstring (applicable for funds that are on control and do not allow spending over budget).

- A **Date out of bounds** error means that the transaction date exceeds the project start/end date.

If the error is not resolved, Purchasing Services cannot see or process the requisition.
Create a Blanket Requisition

Requesters can enter blanket purchase orders in eProcurement, at the beginning of a new fiscal year on July 1 or later, or at any time during the fiscal year as needed. If you are paying a supplier multiple times in a fiscal year, a blanket order is required. Refer to Step 13c below for more details.

1. Log into PeopleSoft Financials

2. Navigation: eProcurement > Requisition

3. Click Requisition Settings.
4. When the **Requisition Settings** page appears, verify the following:

- **Business Unit** is UVM01
- **Requester** user id is correct
- **Currency** value is USD
- **Ship To** location is correct (if you need to change the **Ship To Location** and the value you need is not in the search list, add the address information in the line **Comments** field (See Step 27 in Create a Requisition for instructions on adding line comments). **Please note: The Add One Time Address link should not be used for Ship To address changes.**)
- **Accounting Defaults** (**Chartfields2** and **Chartfields3** tabs) are correct; do not change them on this page.
- In the **Requisition Name** field, enter a meaningful name for the requisition. This will make searching for the requisition easier in the future. **If left blank, the system inserts the Requisition ID here upon saving, which is not recommended.**

Click **OK**.

*If your requisition defaults are not correct, enter a Footprint for assistance.*
5. Click the Special Requests link.

6. Enter specific item or service information into the Item Description field (e.g., lab supplies, beakers, pipets, glassware, test tubes) or (snowplow/lawn care monthly services). Requisitions with insufficient descriptions will be returned to the requester for revisions, (e.g., only supplier’s name entered, miscellaneous supplies, requisition #, etc.).

7. In the Price field, enter a dollar amount estimate of the total spend through the blanket end date. If entering a blanket order based on a monthly charge or number of units, enter the monthly/unit amount in the Price field, e.g., 500.00, and the number of months in the Quantity field.

8. Enter the number of units to purchase in the Quantity field. If it is a blanket order by dollar amount, enter 1 as the quantity. If the blanket order is by month or number of units, enter the correct quantity for the remaining fiscal year, e.g., 12 months.

9. Enter the unit of measure in the Unit of Measure field, or click on the search icon.
to find the unit. If the requested item’s unit of measure is not listed, use each (EA).

Most commonly used units of measure:

- BOX – Box
- CS – Case
- EA - Each
- LOT – Batch Lot
- MO – Month
- PAK – Pak
- SET – Set
- UNT – Units

10. **For Category and Supplier ID Selection** – please refer to Steps 10-19 under Create a Requisition above.

11. Complete the **Blanket PO Dates** field for all blanket purchase orders. The start and end dates of the blanket purchase order must be entered in *exactly* the following format: **mm/dd/yy – mm/dd/yy**, (e.g., 07/01/18-06/30/19).

12. When the necessary item information has been entered, click **Add to Cart** to place this item on the requisition.

13. **For remaining Blanket Requisition Processing** – please refer to Steps 24-34 under “Create a Requisition” above.

14. **Additional Notes for Blanket Requisitions:**
   a. Use your best estimate for total spend. **Hint:** use last fiscal year’s total spend amount as a starting amount. If you go over that amount, email Purchasing Services to increase PO# 123456 by $xx.xx amount to cover the remainder of the fiscal year.

   b. If your requisition is connected to an RFP (Request for Proposal) and is a UVM contracted supplier, include the RFP# in the comments section. This means no documents are required to be attached to your requisition because Purchasing already has the documents on file for audit purposes.

   c. Blanket Requisitions can be used for many different purposes to a supplier:
      - Purchasing goods or services multiple times through the fiscal year
      - Purchasing goods or services on a monthly basis
      - Purchasing goods or services quarterly
      - Purchasing services from an individual 3 or more times during academic year
      - Purchasing goods or services multiple times on different chartstrings

   d. Include previous fiscal year purchase order # in comment field, if applicable.
Create a Requisition for the Computer Depot

1. Log in to PeopleSoft Financials.

2. Navigation: Main Menu > eProcurement > Requisition

3. Click Requisition Settings.

4. When the Requisition Settings page appears, verify the following:

   - **Business Unit** is UVM01
   - **Requester** user id is correct
   - **Currency** value is USD
   - **Ship To** location is correct (if you need to change the Ship To Location and the value you need is not in the search list, add the address information in the line Comments field (See Step 12)
below for instructions on adding line comments).

- **Accounting Defaults** *(Chartfields2 and Chartfields3 tabs)* are correct; do not change them on this page.
- In the **Requisition Name** field, enter a meaningful name for the requisition. This will make searching for the requisition easier in the future. *If left blank, the system inserts the Requisition ID here upon saving, which is not recommended.*

Click **OK**.

5. If you know part of the item name, enter it in the **Search** field, and press **Enter** or click **Search**. In this example, searching by the term *MacBook* returns 46 items. To view the entire catalog, see step 6.

6. To browse all depot items, click the **Depot Catalog** link.
7. In the **Catalog Search Results**, find the desired item and enter the quantity to order in the Quantity field. Click **Add** to add the item to the cart. To add multiple items to the cart at once, see step 6.

8. To add multiple items to the cart at once, click the **Checkbox** to the left of each desired item, enter the quantity for each, then click the **Cart** icon above the Catalog Search Results section (if no quantities are entered per item, a quantity of 1 will be used).
9. Requested items appear in the **Shopping Cart**, in the upper right corner of the screen. When all desired items are in the **Shopping Cart**, click one of the **Checkout** buttons.

10. In the **Requisition Name** field, verify or update the name entered in step 4.
11. Review the **Cart Summary** to ensure the items and quantities are accurate. To remove one line from the requisition, click the **Trashcan** icon to the far right of the line. For multiple line deletion, click the **checkbox** to the left of the line items, then click **Delete Selected** link below the items.

12. Click the **icon** to expand the requisition line details. Review the **Ship To Address** and select a different one if necessary. If the location you need is not in the search list, click the **Comments** bubble and add the address information on the **Line Comment page**, shown below.

13. **Line Comment page:**

   ![Line Comment page image]
14. Click the icon to expand the Accounting Lines. On the Chartfields2, review the Chartfield values to which this requisition item will be charged and change, or split if necessary.

**Note**: DO NOT change the value in the Account field. The system derives the Account value based on the Item Category.

15. To split the item cost between multiple chartstrings, add distribution line(s). Click the sign to the far right of the Accounting Line to create another line.

To change how the expenses are distributed, click the Distribute By dropdown, and select Qty (Quantity) or Amt (Amount). Select the method to use to allocate the expense account distribution.

Selecting either option enables you to distribute by percentage. If you change the amount or quantity, the percent is adjusted. If you change the percent, the amount or quantity is adjusted. In either case, the total must equal 100 percent.

**Amount**: Select to enter a value in the Amount field. The sum of all distribution amounts must equal the schedule amount (the value in the Amount field on the Maintain Requisitions - Schedule page).

**Quantity**: Select to enter a value in the Req Qty field. The sum of all distribution quantities must equal the schedule quantity (the value in the Req Qty field on the Maintain Requisitions - Schedule page).

Enter the Quantity values or Percent values accordingly.
Update the values in the chartfields on the **Chartfields2** tab as needed. Repeat for all requisition lines.

Repeat steps 12-14 for all requisition lines.

16. When review is complete, click **Save & Submit**. This will send the requisition to the **Computer Depot**. When they receive the requisition, they will send an approval email. The expense will be charged to the chartstring(s) provided. In the event that a chartstring is not valid, the Depot will ask the requisitioner for a new, valid chartstring. The requisition will be budget-checked by the **Computer Depot** once they have received the valid chartstring(s).
Managing & Tracking Requisitions

The Requisition Details Query is helpful for finding information related to the requisition, including the purchase order, invoice, and payments made.

The query provides the following data:

- PO Business Unit
- Requisition ID
- Requisition Line number
- Associated PO #, PO Line #, PO Line Amount
- Supplier Name, Invoice Number, Invoice Date, Invoice Amount
- Associated Voucher #
- UVM Check #, Payment Date, Method, Status (P = Paid, V = Void)

Run the Requisition Details Query

1. Log in to PeopleSoft Financials

3. Type UV_REQUISITIONDETAILS1 in the Search By field.

4. Click Search. The system will display the query in the Query section below the search.

   Tip: Click the Favorite link in the far right column to add this query to the My Favorite Queries section in Query Viewer. Once it is designated a favorite, it will be available in Query Viewer without having to search. You have the option to remove these queries from the My Favorite Queries section as needed, by clicking the in the Remove column at the far right.
5. Running the query to HTML or Excel starts with the same steps:
   - Click the HTML or the Excel link. In the new browser tab that opens, supply the criteria and click View Results.

   - HTML: The system displays the output data below the criteria prompts. Download if desired using the Excel Spreadsheet or CSV Text File links, located above the output data.

   - Excel: The output id downloaded to an Excel file. Screen location for launching the downloaded file varies by browser.

6. This query requires that you supply criteria. Whether running to HTML or Excel, a new browser tab will open, displaying required prompts for Unit, Req ID, and PO Number.

   - Unit: Enter UVM01 into the field, or use the search icon to select the value. This is the purchasing Business Unit for the requisition.

   - Req ID & PO Number: These fields display % next to them. Either data element is sufficient. Enter the id number you have into the corresponding field. Enter % in the other.

   **Examples:**
   If you have the **Requisition ID**, enter criteria as follows:
If you have the **PO Number**, enter criteria as follows:

![UV_REQUISITION_DETAILS - Use when pymnt icon is active](image)

### View Chartstring Information

Chartstrings track when and where goods and services are charged within the University. Requisition data including business unit, department, price and budget is found here.

1. Log in to [PeopleSoft Financials](#)
2. Navigate to: Main Menu > eProcurement > Manage Requisitions
3. Enter the search criteria for a Requisition. Click **Search**.
4. Click the **Req ID** link to open the **Requisition Details** page.
5. Click the ▶ icon to expand the Requisition Line.

6. View the Requisition Information. Click the ▶ icon to expand the Accounting Lines section for accounting details. Chartstring Information is on the More Details tab.

If there are multiple accounting lines on this requisition line, click the Next/Previous Arrows ▶, First/Last links, or View All option to see additional lines.
Manage Requisitions Using the Lifespan

The Request Lifespan is a tool that allows users to view each step in the procurement process. The status of where the requisition is currently in its lifespan is illustrated. Additional details can also be found here.

1. Log in to PeopleSoft Financials

2. Navigation: eProcurement > Manage Requisitions

3. The Business Unit field will populate automatically with UVM01. This is the default Purchasing Business Unit.

4. Verify the Requester user id.

5. Enter a Requisition ID if known, or leave the field blank.

6. Verify the Date From and Date To fields to ensure that they are correct.

7. Click Search.

8. Requisitions meeting the search criteria are displayed.

9. To view more information regarding a requisition, expand the section by clicking on the triangle to the left of the line.

10. The Request Lifespan is displayed. In the Request Lifespan, links will become active as that step in the procurement process is completed.

Only requisition lines that have been budget-checked to Valid status, approved, and have a supplier assigned to them, will move forward in the purchasing process.
11. After Purchasing Services has created a purchase order for the requisition, the Purchase Orders link will become active in the Request Lifespan section.

As shown above, the Request State for this is Complete. Definitions for requisition statuses are:
  
  PO Created – requisition is in process
  PO Approved – requisition is in process
  PO Dispatched – PO successfully processed and sent to supplier
  PO Complete – PO closed and encumbrance(s) released

12. Click the Purchase Orders link to view the Purchase Order Inquiry page. The PO Number and Requisition details are displayed.
13. As the Disbursement Center completes more steps in the procurement process, additional links will activate until the lifespan is completed.

14. An active Invoice icon indicates that an invoice is being processed for payment. Click the Invoice icon to view the voucher number, invoice amount and supplier information. Be sure to click View All, or scroll through to see all voucher lines associated with this PO.

15. An active Payment icon indicates payment has been processed. Click the Payment icon to view the check number (Payment Reference ID), check date, payment address, and other payment information. Be sure to click View All, or scroll through to see all voucher payment lines associated with this PO.
### Review Payments

Review Payment Information

This section provides guidance on how to review payments to the University’s suppliers.

1. Log in to PeopleSoft Financials

The Payment Inquiry page is displayed. Enter search criteria as outlined in the steps below.

   **Note:** Up to 300 supplier payments are displayed. To display additional rows, increase the number in the Max Rows field, which is located below the search criteria fields.

3. Ensure that SHARE is in the Remit SetID field. If it does not default in, enter it manually or use the search icon to the right of the field to select it.

4. To narrow the search results, enter a payment date range, e.g., 07/01/2015 to 06/30/16.

5. Click the search icon to the right of the Supplier Name field. Enter the beginning of the supplier name (e.g., staples for Staples Advantage) then click on the search icon to search for this supplier.

   The search provides a list of all suppliers whose name begins with staples.

   ![Search Results](image)

   Using the percent (%) sign allows for a more flexible supplier search. The search below provides all suppliers with Vermont in the name.

   **Note:** The search produces more than 300 results, so you may need to use additional search criteria. The search can be further refined using the Advanced Lookup.
The search using Supplier Name contains “Vermont Com” produces a shorter list of results. Use a specific piece of the supplier’s name to narrow down your search.
6. Once a supplier is selected, the supplier name will populate in the “From” and “To” Fields. Click Search.

7. The Payment Inquiry Result section will be displayed at the bottom of the screen. The columns can be sorted by clicking the column headers.

The Payment Reference ID Number is the check, ACH or E-Payment number.
The **Supplier Details** tab displays the supplier address to which payment was sent.

8. Click on **Payment Reference ID** to display more information including vouchers paid on that payment.

9. Click the **Voucher ID** link to display voucher-related information on the Voucher Inquiry page.
Review Voucher Information

**Note:** To access this page, users must have the ePro Requester security role.

1. Log in to PeopleSoft Financials

   The Voucher Inquiry page is displayed. Enter search criteria as outlined in the steps below.

3. Change the Business Unit from UVM01 to AP001.

4. Enter the Voucher ID number or the Invoice ID number, if known.

5. Enter any other criteria to limit the data being returned. Commonly, searches are done by Supplier ID, Department, Account, Purchase Order Number or Date Range.
6. Click **Search**.

Voucher Inquiry

7. Click the tabs at the top of the **Voucher Inquiry Results** section to display: **Voucher Details**, **Amounts**, **More Details**, or **Supplier Details**.
8. Click the **Actions** link in the far left column to access links to: Review Accounting Entries, Match Workbench, Payment Information, Voucher Details.

9. Click the **Review Accounting Entries** link to review the associated accounting entries.
10. Click the **Payment Information** link to display Payment Reference ID, Payment Date, Payment Amount, and Voucher Paid Amount.

**Note:** The **Payment Reference ID** displayed is the check, ACH or E-Payment number.

Click the number to link to the **Vouchers For a Payment** page.
Review the Purchase Order Activity Summary

Use the Purchase Order Activity Summary to view payment data on a purchase order and to view the invoiced-to-date totals for a blanket purchase order.

1. Log in to PeopleSoft Financials.

2. Navigation: **eProcurement > Reports > PO Activity Summary**

3. On the **PO Activity Summary** page, type in the desired search criteria. Click **Search**.
4. The **Activity Summary** page will be displayed. In the **Lines** section, the **Details** tab displays the total dollar amount of the PO Line; use the scrollbar to view details.

   **Note:** Click on the tabs across the top individually or to view all information at once, Click the **Expand All Columns** icon.

   ![Activity Summary]

   **Lines**

5. To see additional detail about the item, click the item’s link in the **Item Description** column.

   ![Item Description]

6. Click the **Invoice** tab for the invoices paid to date. For purchase orders with multiple lines, the Invoice tab will show which lines have been invoiced to date. This tab also displays the amount remaining on this line of the purchase order. Use the scrollbar to view the **Un-invoiced Amount** column.
7. Select the **Invoice** icon to display the associated voucher numbers and amount paid for each.

Click the **Voucher** number link to open the **Voucher Inquiry** page, which displays invoice number, invoice date, accounting date, etc.
8. Click the Activity Summary link to return to the Activity Summary page.

9. The Matched tab displays the quantity and dollar amount of invoices matched on a line of a purchase order. This information is useful for monitoring blanket POs during the fiscal year.

10. In the top right section of the Lines section, there is a Download to Excel icon. Download the data to a spreadsheet for further analysis if desired.

11. Use the Personalize link to rearrange the order in which page content is displayed. For example, the Amount Invoiced column, Amount Un-invoiced column and Amount Matched column can be moved to the Details tab, thus allowing a summarized view of the purchase order activity at a glance.

   To move a column’s position, click on it, then use the up and down arrows near the top of the Column Order section to move it. Once complete, scroll down and click ok. The grid will have your new settings until you elect to change them.
FAQs

Is backup documentation required for a requisition?

Yes, backup documents are required, and must be attached when submitting the requisition in PeopleSoft, for the majority of orders. See Create a Requisition, steps 27-29 for instructions on attachments.

Exceptions to this are:

- If you are completing a blanket order with a UVM-contracted supplier, backup documents are not required.
- If you have an RFP# for a requisition, backup documents are not required.

What type of product description shows up on the budget reports?

On the Budget Transaction Detail Report, purchase order information is displayed in the following order: PO Number, Supplier Name, Line Description from the PO (30 characters), and Requisition ID.
How many approvals does a requisition go through?

It depends on the purchase, the dollar amount, and the type of budget, but a standard workflow for requisitions not greater than $50,000 is as follows:

Requester > Manager (or designated approver) > Purchasing Services > supplier.

Please refer to the Contract Approval and Signatory Requirements for amounts over $50,000.

Can I modify my requisition if changes are needed?

Yes, but only if a purchase order has not yet been created. Use the Change Requisition function to modify a requisition. Navigation: eProcurement > Manage Requisitions. Search for the requisition. From the [Select Action] dropdown box on the right-hand side, choose Edit.

Will a copy of a purchase order be sent to me after I submit a requisition?

Yes, a copy of the purchase order will be emailed to the supplier and to the requester.

What is the turnaround time for an invoice to be paid?

UVM default terms are Net 30 days, unless a contract/agreement states a different payment term. Expect 7 to 10 business days for the Disbursement Center to process invoices for payment.

If a supplier does not exist in PeopleSoft, what do I do?

Please ask the supplier to complete a New Supplier W-9 form, found on the Disbursement Center or Purchasing Services website, and attach it to the requisition. The supplier will then be added in PeopleSoft.

How do I change the dollar amount on a blanket order?

Send an email to purchasing@uvm.edu that includes the following: PO#, Supplier Name, Line #, and amount of increase or decrease with new total. Estimate the amount for the remainder of the fiscal year, not just the amount for current invoices. Purchasing will make the changes and send a copy of the corrected purchase order.

Once payment is made on a purchase order, how do I close the requisition and PO to clear the encumbrance?

Please email purchasing@uvm.edu with a list of Purchase Orders and Requisitions to be closed. Use “Close POs” in the subject line of your request.

How do I change a chartstring on an Existing Purchase Order?

To change a chartstring on an existing PO, a new requisition must be created. The description should be “Add line to PO XXXXXX.” This will create a new line on the existing PO. Please note in the comments if the original line(s) should be closed.

General Hints

• When entering a requisition for an individual who is providing a service, please indicate the date and nature of the service in the description field. Be sure to attach a services agreement for amounts exceeding $1,000 (services and expenses).

• Be sure to account for any freight or shipping costs on the requisition.

• Backup documentation (Employee versus Independent Contractor form, Quotes, Contracts/Agreements, etc.) must be attached when submitting the requisition. See Create a Requisition, steps 27-29.

• If a one-time shipping address is needed, please note that in the comments section. DO NOT use the Modify Shipping Address hyperlink. See Create a Requisition, step 27.

• There can be multiple items in a requisition, but ONLY one supplier per requisition.

• Track Requisition status through Manage Requisitions. The Request Lifespan displays the progress of the requisition to a Purchase Order to Invoice(s) to Payment(s).

• The Disbursement Center cannot overpay (within established limits) a purchase order. If an invoice cannot be paid because there isn’t enough encumbrance remaining on the PO, the invoice will be returned to the requester. To increase the dollar amount of a PO, please e-mail purchasing@uvm.edu. Estimate the amount necessary for the remaining fiscal year—not just the amount of the current invoice.

• There is an automated process to close purchase orders based on a PO being fully matched. This means a PO with a $0 balance. Purchasing Services will not contact departments to ask if a PO can be closed. It will be closed automatically when the balance is $0.

• Do not underestimate the dollar amount needed during the year on blanket purchase orders. If the PO is fully matched (the PO amount is $0), a system process will automatically close the PO. If additional invoices are received for a closed purchase order, a new requisition must be entered.

Personalize Column Order

Personalization of pages is available in PeopleSoft Financials. Review the process for Customize Column Order in the PeopleSoft Tips User Guide. The process is identical for all personalization in PeopleSoft Financials.

Supplier Information

• UVM Supplier (Vendor) W-9 Form. It is critically important that UVM receives a completed W-9, to set up a new supplier correctly and determine IRS 1099 Misc. tax reporting classification.

• If a requester is already in contact with a supplier, please ask that they complete the form. This will shorten the time needed for purchase order creation.
• Attach the completed Supplier W-9 Form to the requisition.
• The results of the Supplier W-9 Form for a company will determine if an Employee versus Independent Contractor form is required.
• An Employee versus Independent Contractor Status Determination form is always required for an individual that is providing services.
• The Employee versus Independent Contractor form is only to be completed by the requesting department, NEVER by the supplier.
