

GoCrop Data Entry Sheets for Remote Updates

The following data is needed to update your GoCrop account. Please print off as many record sheets as needed to get your records into the format that will make it fit into goCrop the easiest.

If you have acquired new land we will need the following pieces of information:

- 1) A complete set of FSA maps with tract and field numbers
- 2) Soil factsheets
- 3) New RUSLE2 erosion predictions
- 4) Current (within the last 3 years) soil tests

If the number of animals on your farm has changed we will need to update:

- 1) Livestock inventory
- 2) Manure production values

To update goCrop please attach the following documents so we can get the information into the tool:

- 1) Any new soil tests for the current year. Make sure we can match your field names in goCrop to what is listed on the soil tests. If multiple fields are included in a sample make sure that is clear as well.
- 2) Any new manure tests for the current year, should be one per structure.
- 3) The data record sheets completed for each field which will have harvest data, manure application data, and fertilizer application data.
- 4) Please indicate in the notes section any changes in rotation or cropping plans for the upcoming year for fields that need it.
