

Industrial Hemp Training Program

Join in on this **FREE Industrial Hemp Training Program for Agricultural/Technical Service Providers!**

Webinar Trainings—up to 13 CCA credits total

Each webinar will host a farmer, researcher, or other expert practitioner. Webinars will discuss common obstacles to growing a successful hemp crop, address these issues through field proven technical knowledge, and follow a training plan that will best enable the ASP to support the farmers. Live on Tuesdays, 12pm-1pm.

Note: The order of webinar topics is tentative and subject to change.

UVM Industrial Hemp Conference—CCA credits

Participating ASPs will attend the 2021 and 2022 Conferences at no cost to them!

In-Field Intensive Trainings—CCA credits

Five (5) in-field intensive trainings will be offered during Summer/Fall 2021. Participating ASPs are required to attend at least one. They will be hosted by local collaborating farms/processing facilities. These hands-on workshops will foster a stronger working knowledge of hemp equipment, soil health, fertility, techniques, and technology used to drive a successful hemp crop in the Northeast.

Interested in Enrolling?

Register by October 26, 2020!
