*FY21 counting methodology changed with implementation of UVMClick as replacement for InfoEd

Proposal counts

- UVMClick counts each proposal just once, in the year it was submitted. So a five year proposal requesting \$100k a year, would have been counted as one proposal at \$500k.
- InfoEd proposals were counted as separate increments/periods. So a five year proposal requesting \$100k a year, would have been counted once in each year of the proposal at \$100k each year.

Award counts

- UVMClick awards are reported at the "Project" level; One single award can be split into multiple projects and in these cases, each "project" is counted as a separate award.
- InfoEd awards were not split into separate projects, so each award was counted on just one line in our reports.
