

Michael T. Ruggiero

Academic Appointments

2018–Present **Assistant Professor of Chemistry**, *University of Vermont*, Burlington, Vermont, USA.

Education

2014–2016 **Doctor of Philosophy – Physical Chemistry**, *Syracuse University*, Syracuse, New York, USA.

2012–2014 **Master of Philosophy – Physical Chemistry**, *Syracuse University*, Syracuse, New York, USA.

2008–2012 **Bachelor of Science – Chemistry (ACS Certified), Mathematics Minor**, *State University of New York, College at Geneseo*, Geneseo, New York, USA.

Research Experience

2016–2018 **Postdoctoral Research Associate**, UNIVERSITY OF CAMBRIDGE, Cambridge, UK.

*Department of Chemical Engineering and Biotechnology
Terahertz Applications Group, PI: Prof. J. Axel Zeitler*

2016–Present **Guest Researcher**, MEDIMMUNE LTD., Cambridge, UK.

Contact: Dr. Chris van der Walle

2012–2016 **Research Assistant**, SYRACUSE UNIVERSITY, Syracuse, New York, USA.

*Supervisor: Prof. Timothy M. Korter
Thesis Title: Elucidating the Electronic Origins of Intermolecular Forces in Crystalline Solids*

2015 **Invited Researcher**, UNIVERSITY OF TORINO, Turin, IT.

Host: Prof. Roberto Orlando

2011–2012 **Undergraduate Research Assistant**, SUNY GENESEO, Geneseo, New York, USA.

Supervisor: Prof. Jeffrey J. Peterson

Teaching Experience

2018 – **Physical Chemistry Professor**, *University of Vermont*, Burlington, Vermont.

Present Taught advanced physical chemistry and related topics to upper level undergraduates and graduate students

*Department of Chemistry, University of Vermont
82 University Place, Burlington, VT 05405, United States of America*

- 2016–2018 **Master's Students Supervisor**, UNIVERSITY OF CAMBRIDGE, Cambridge, UK.
Supervised chemistry master's students. Responsible for generating a research project and proposal for master's students to perform within two terms. Prepared the students to use a variety of experimental and computational techniques, and supervised their day-to-day laboratory activities.
- 2016–2018 **Chemical Engineering Research Supervisor**, UNIVERSITY OF CAMBRIDGE, Cambridge, UK.
Supervised chemical engineering undergraduate and master's research students. Responsible for generating a suitable research project and proposal for final-year students to perform within two terms. Prepared the students to use a variety of experimental and computational techniques, and supervised their day-to-day laboratory activities.
- 2016–2018 **Chemistry Supervisions**, CHURCHILL COLLEGE, UNIVERSITY OF CAMBRIDGE, Cambridge, UK.
Taught chemistry IA (general chemistry) and IB part A (physical chemistry/quantum mechanics) undergraduate students. Supervisions were small group teaching (2-4 students per session) that were in addition to the student's lecture courses. Was responsible for writing and assigning homework problems, and designing lessons around the lecture courses based on individual needs from week-to-week.
- 2016–2018 **Postgraduate Mentor**, CHURCHILL COLLEGE, UNIVERSITY OF CAMBRIDGE, Cambridge, UK.
Mentored and advised postgraduate students who were studying in Churchill College. Responsible for keeping up to date on the student's progress, their wellbeing, and offering advice for a successful career. Meetings with students were held both formally and informally throughout the year.
- 2012–2014 **Teaching Assistant**, SYRACUSE UNIVERSITY, Syracuse, New York, USA.
Taught physical chemistry I (thermodynamics) and II (quantum mechanics) lecture and laboratory. Assisted in designing and teaching laboratory experiments to advanced undergraduate students. Responsibilities included pre-laboratory instruction, experimental set-up and break-down, post-laboratory assistance (office hours), and grading scientific reports.

Grants and Awards

- 2018 Forbes 30 Under 30
Annual list chronicling the brashiest entrepreneurs across the United States and Canada. One of 30 in the Science category. Featured in numerous print and web news outlets.
- 2018 The International Society of Infrared, Millimeter, and Terahertz Waves (IRMMW-THz) 2019 Young Scientist Award Winner
Awarded for "spreading and expanding the translation of terahertz spectroscopy from its core community into the chemical sciences" The IRMMW-THz Young Scientist Award recognizes interdisciplinary, outstanding scientific work by a young scientist who has made innovative contributions and discoveries in the field of infrared, millimeter, and terahertz waves.
- 2018 UVM OVPR Express Grant
Awarded funds to build a boutique experimental terahertz spectrometer for additional characterization potential.

Department of Chemistry, University of Vermont
82 University Place, Burlington, VT 05405, United States of America

- 2017 ARCHER HPC 500,000 Core Hours
Co-Investigator on a resource grant for the UK National Supercomputer, was awarded 500,000 CPU hours for a four-month period (September-December 2017).
- 2017 UK Best Use of ARCHER Competition Winner
Was selected as one of the leading users of the UK ARCHER National Supercomputer for work related to the study of dynamics of amorphous solids using *ab initio* molecular dynamics and solid-state density functional theory methods.
- 2017 Diamond Light source Beam Time
Three days of X-ray beam time for the study of radial distribution function in amorphous pharmaceuticals
- 2017 ISIS (TOSCA) Beam Time
Five days of Tosca beam time for the study of the low-frequency dynamics in organic semiconducting crystals
- 2017 ISIS (SANDALS) Beam Time
Five days of Sandals beam time for the study of amorphous sorbitol-water mixtures
- 2016 Churchill College Postdoctoral Fellowship Recipient
Received a fellowship from Churchill College (Cambridge) in a highly competitive competition
- 2016 European Molecular Biology Organisation Travel Fellowship Recipient
Received €10,000 to conduct research at the University of Torino (Italy) for the computational study of anharmonicity in solid materials

Laboratory skills

Experimental Techniques

- Mid and Far Infrared Spectroscopies (FTIR, ATR, THz)
- Raman Spectroscopy
- UV-Visible-NIR Spectroscopy
- Differential Scanning Calorimetry
- Isothermal Titration Calorimetry
- Chromatography (Gas, Liquid, High Performance Liquid)
- Single-Crystal and Powder X-ray Diffraction
- Raman Microscopy
- Single-Photon Spectroscopy
- Thermal Gravimetric Analysis
- Mass Spectroscopy
- Organic and Inorganic Synthesis

Theoretical Techniques

- DFT CRYSTAL, CP2K, GAUSSIAN, QUANTUM ESPRESSO, VASP, CASTEP
- MD CP2K, GROMACS, AMBER
- Programming PYTHON, FORTRAN, MATLAB, JAVA, C++, HTML/CSS, JAVASCRIPT

Department of Chemistry, University of Vermont
82 University Place, Burlington, VT 05405, United States of America
