

Dissemination Plan

It is our intention to register and submit results from the proposed clinical trial to ClinicalTrials.gov, as outlined in the NIH Policy on the Dissemination of NIH-Funded Clinical Trial Information. Briefly, we will register the trial no later than 21 calendar days after the enrollment of the first participant, and will submit summary results information no later than one year after the trial's primary completion date. In addition, all informed consent documents will include a specific statement informing subjects that the trial will be registered and results will be posted to ClinicalTrials.gov. We will comply with all terms and conditions of the NIH award.

The University of Vermont currently has "Guidelines for Registering a Clinical Trial" in place, to assist faculty in complying with federal policy regarding broad and responsible dissemination of clinical trials information. The Institution is currently developing an internal policy to ensure that awardees comply with the NIH Policy on the Dissemination of NIH-Funded Clinical Trial Information, effective January 18, 2017. It is our expectation that by the time of award a policy will be in place, at which time it will supplement or supersede, as appropriate, the current Guidelines for Registering a Clinical Trial.
