

Evaluation Workgroup: Training to Implementation Gap Analysis

Presented by:

Nicole Richard

University of Rhode Island

Evaluation Workgroup

Goal:

- Identify knowledge gaps contributed to difficulties after taking the FSPCA PCHF training.

Objectives

- Develop PCHF training evaluation tool
- Promote regional usage
- Identify supports needed for compliance with PCHF rule

How to Access the Evaluation Tool

- SurveyMonkey link:
 - www.surveymonkey.com/r/PCHFeval_NECAFS
- Download pdf of the evaluation tool

THE NORTHEAST CENTER TO ADVANCE FOOD SAFETY

PC Resources

The Preventive Controls Working Group

The Preventive Controls Working Group is a subset of the Northeast Center to Advance Food Safety that aims to advance understanding and practice of preventive controls for human food among the region's small and very small food processors. This is achieved through improving awareness of, access to resources about, and evaluation of training regarding Title 21 CFR Part 117: Current Good Manufacturing Practice, Hazard Analysis, and Risk-Based Preventive Controls for Human Food, informally known as the Preventive Controls for Human Food (PCHF) Rule.

The Preventive Controls Working Group was created in 2018 to coordinate and facilitate activities of NECAFS members focused on providing PCHF-focused food safety training, education, extension, outreach, and technical assistance to small and very small food processors in the Northeast United States. The group seeks to leverage NECAFS' strategic objectives to meet these ends through the work of three sub-

Preventive Controls Course Evaluations

This evaluation has been developed by partner subject matter experts within the Northeast Center to Advance Food Safety (NECAFS) to assess the regional impact of training and to identify additional technical support needs of those impacted by the FSMA Preventive Control for Human Food (PCHF) rule.

Please help us evaluate the FSPCA PCHF workshop.

Please read the [instructions](#) for using the regional evaluation tool. They include options for using either a printed or online version.

Evaluation Tool

- Workshop format
- Respondent job function
- Food(s) manufactured
- Compliance with FSMA PCHF rule
- Self-rated knowledge
- Topic areas for more information

Data Analysis

- This data are intended to provide a regional picture of topic areas where workshop participants have difficulties.
- This data will be integrated with regional and national efforts to provide support to those impacted by the PCHF rule.

Participation

- Summary of your workshop
- Summary of regional efforts
