Subject: Parking Fee Payroll Deductions

---

This is to advise you that, on February 1, 2021, payroll deductions for parking permit fees will resume at 50% of your regular permit deduction rate. This reduced rate will continue through June 30, 2021.

Because Transportation & Parking Services (TPS) is not a general fund department, the cost of maintaining parking lots, shuttle buses, and other associated activities is funded by revenue generated by the department. The reduction in the number of staff and faculty on campus during the response to COVID-19 has not significantly diminished the ongoing expenses associated with the maintenance and services provided to the University by TPS.

If you wish to turn in your permit to avoid the fee, you can do so at any time. However, if you reapply for green permits, after turning them in, your application will go to the end of the green permit waiting list.
