

## General Effectiveness by Disinfectant Type

- Bacterial spores
- Protozoal oocysts (cryptosporidium)
- Helminth eggs (Ascaris)
- Mycobacterium tuberculosis
- Small nonenveloped viruses (parvovirus, Hepatitis B)
- Protozoal cysts (Giardia)
- Fungal spores
- Gram negative bacteria
- Vegetative fungi & algae
- Large nonenveloped viruses (Adenovirus)
- Gram positive bacteria
- Lipid-containing (enveloped) viruses (HIV)
