

UVM Risk Management & Safety

UVM Laboratory HCOC Inventory

Step 3 of 3: Enter *Hazardous Chemicals of Concern* information:

Notes on data entry:

- For laboratories with inventories already in our database, chemicals are shown in red if they are already listed for your lab. Add or change the chemical quantity class based on your expected use this year.
- It is **not necessary** to click the "0" column for chemicals not in the laboratory. That column is there to remove chemicals no longer in inventory or those that were mistakenly included.
- The chemical class links below are designed to help you navigate the list quickly. The easiest way to collect the information necessary to fill out the form is to print out a blank page (there's a [print friendly version](#) here) and mark the paper copy with the appropriate data before beginning the electronic input process.
- **Note:** You may have chemicals in your laboratory that are not on the list below. We need to include additional chemicals in the inventory that would be in the two larger categories (i.e. those you have more than 5 liters or 1 kg of). If you have a chemical that falls in that category, please email this information to us at safety@uvm.edu and we will add it to the inventory list.

When you have finished entering data on this page:

- Click the "Insert into Database" button at the bottom of this page.

Questions or comments about this form should be sent to safety@uvm.edu

Laboratory Information		
Building Votey Hall	Room(s) 999	Date of Inventory (MM/DD/YY) <input type="text"/> <input type="button" value="Fill in today"/> Last inventory: 04/09/19
Chemicals Stored in the Laboratory and Average Daily Amount Present
