

Hello everyone! I've been in the Senate for the past year striving to keep my last platform of "giving everybody a voice."

I have:

1. Co-written the resolution condemning the UVM administration's disproportional suspensions for Green and Gold Promise violations.
2. Attended monthly meetings with faculty staff and community members.
3. Began the fight for inclusive spaces for women and queer students at the university gyms.

I wish to elaborate upon my previous platform and continue giving a voice to everyone. I am pushing for an expansion of the CAPS program for mental health, for a greater emphasis on cleaner energy, and to foster a better community between the administration, the student body, and the student government association.

Thank you all!

Troy Kane
